R.M.K GROUP OF INSTITUTIONS

COURSE OBJECTIVES

The course is designed to:

- Develop a holistic perspective on self, family, society, and nature through the process of self-exploration.
- Gain clarity on the harmony existing within oneself, and across family, society, and nature.
- Strengthen the ability to self-reflect and evaluate one's own thoughts and actions.
- Build the commitment and courage to act in accordance with these values.

R.M.K GROUP OF INSTITUTIONS

Pre-requisites

Subject code	**26HS102**
Subject Name	**Human Values and Ethics**
Unit-1 Title	**Need, Basic Guidelines, Content and Process for Value Education**
Prerequisites	**UHV-I Course**

R.M.K GROUP OF INSTITUTIONS

Knowledge and Attitude Profile (WK)

WK1 : A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.

WK2 : Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.

WK3 : A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.

WK4 : Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.

WK5 : Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.

WK6 : Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.

WK7 : Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.

WK8 : Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.

WK9 : Ethics, inclusive behavior and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

If the monome is trifunctional, the cross-linked polymer is formed on polymerisation.

R.M.K GROUP OF INSTITUTIONS

Program Outcomes (POs)

PO1: Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.

PO2: Problem Analysis: Identify, formulate, review research literature and analyse complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)

PO3: Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)

PO4: Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).

PO5: Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)

PO6: The Engineer and The World: Analyse and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).

PO7: Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)

PO8: Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences

PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

R.M.K GROUP OF INSTITUTIONS

SYLLABUS

COURSE CODE		L	T	P	C
26HS102	(Common to all branches)	2	1	0	3

UNIT I	**Need, Basic Guidelines, Content and Process for Value Education**	**9**

Purpose and motivation for the course, recapitulation from Universal Human Values-I Self-Exploration–what is it? - Its content and process; 'Natural Acceptance' and Experiential Validation- as the process for self-exploration-- Continuous Happiness and Prosperity- A look at basic Human Aspirations-- Right understanding, Relationship and Physical Facility- the basic requirements for fulfillment of aspirations of every human being with their correct priority -- Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario -- Method to fulfil the above human aspirations: understanding and living in harmony at various levels.

UNIT II	**Understanding Harmony in the Human Being – Harmony in Myself!**	**9**

Understanding human being as a co-existence of the sentient 'I' and the material 'Body' --Understanding the needs of Self ('I') and 'Body' - happiness and physical facility --Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer) --Understanding the characteristics and activities of 'I' and harmony in 'I' - -'Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail --Programs to ensure Sanyam and Health.

UNIT III	**Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship**	**9**

Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfillment to ensure mutual happiness; Trust and Respect as the foundational values of relationship--Understanding the meaning of Trust; Difference between intention and competence.-- Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship --Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals --Visualizing a universal harmonious order in society- Undivided Society, Universal Order-from family to world family.

R.M.K GROUP OF INSTITUTIONS

UNIT IV	**Understanding Harmony in Nature and Existence – Whole existence as coexistence**	**9**
Understanding the harmony in the Nature--Interconnectedness and mutual fulfilment among the four orders of nature-recyclability and self-regulation in nature -- Understanding Existence as Co-existence of mutually interacting units in all-pervasive space- Holistic perception of harmony at all levels of existence.		
UNIT V	**Implications of the above Holistic Understanding of Harmony on Professional Ethics**	**9**
Natural acceptance of human values --Definitiveness of Ethical Human Conduct --Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order-- Competence in professional ethics: a. Ability to utilize the professional competence for augmenting universal human order b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems, c. Ability to identify and develop appropriate technologies and management patterns for above production systems. -- Case studies of typical holistic technologies, management models and production systems. -- Strategy for transition from the present state to Universal Human Order: a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers b. At the level of society: as mutually enriching institutions and organizations Sum up. Include practice Exercises and Case Studies will be taken up in Practice (tutorial) Sessions e.g. To discuss the conduct as an engineer or scientist etc.		
		TOTAL: 45 PERIODS

COURSE OUTCOMES

Upon completion of the course, the students can

CO1: Explain the process of self-exploration and natural acceptance, and identify the basic human aspirations.

CO2: Apply Self–Body harmony to resolve inner conflicts and implement Self-regulation and Health practices.

CO3: Evaluate human-human relationships based on trust, respect, and justice to propose harmonious co-existence.

CO4: Analyze the interconnectedness of nature's four orders to assess human impact on ecological balance.

CO5: Justify ethical human conduct to evaluate people-friendly and eco-friendly technologies and systems.

CO6: Apply universal human values and ethical principles to demonstrate socially and ecologically responsible conduct.

R.M.K GROUP OF INSTITUTIONS

Activity Based Learning

List your activities throughout a typical day in your life. Categorise these activities as activity for developing right understanding, activity for fulfilment in relationship and activity for physical facility (see table, below).

Activity	**This activity has time and effort for**		
	Right Understanding	Fulfilment in relationship	Physical Facility
Exercise, playing games (2 hrs/day)	?	?	2 hrs (for health of body)
Talking with friends	?	3 hrs (for relationship)	?
Studying	1 hr (studying for values		6 hrs (studying for skills)
This is just a sample list. Please make your own list			
Total Time and Effort	Max 24 hrs		

Find out what percentage of your time and effort is being spent for each of these three. What do you conclude from this exercise?

3. Refer to your natural acceptance and find out if

a. You want to live in relationship (harmony) with others or

b. You want to live in opposition with others or

c. You believe living has to be necessarily in opposition with others, i.e., there is 'struggle for survival', 'survival of the fittest' and check if you feel happy living this way?

HUMAN VALUES AND ETHICS

26HS102

UNIT 1

NEED, BASIC GUIDELINES, CONTENT, AND PROCESS FOR VALUE EDUCATION

R.M.K GROUP OF INSTITUTIONS

1.1 Purpose and motivation for the course, recapitulation from Universal Human Values-I

Introduction

We all want to live fulfilling lives. We want to be happy and make others happy. We used to pick up values, i.e., what is important in life, what is right and what is wrong, what to do and what not to as a human being to live a fulfilling life. The day-to-day interactions in the family, in community and society in general used to help us develop our values.

We need to fulfill our relationship with other human beings or any entity in the rest of nature, that defines our participation with the larger order. This participation constitutes the domain of human values. The value of an entity is its participation in the larger order of which it is a part.

For example, the value of a pen is that it can write. Here writing is the participation of the pen in the bigger order in which it is present along with paper and human beings. The value of an eye is that it can be used for seeing. The value of a vegetable plant is that it provides nutrition to animals and humans.

What is the value of a human being then? This question implies – what is the participation of a human being in the bigger order? For example, if your participation in the process of education is to understand what is being taught, your value is to try to understand. The value of a human being is its natural or expected participation in the larger order – at the level of the individual, at the level of family, at the level of society and ultimately, at the level of nature/existence.

For human beings, this bigger order includes other human beings, plants, air, water, soil, animals, birds, etc., i.e., the entire nature/existence. The value of a human being is its participation in this entire nature/existence. Hence, to understand human values, we need to study the human reality along with all that is there in the entire nature/existence which constitutes the larger order. The role of human beings is to understand and fulfill its relationship with each unit in existence.

R.M.K GROUP OF INSTITUTIONS

1.1.1 Education for a Fulfilling Life

To understand what a fulfilling life means and to understand the programme to ensure it, there is need for appropriate education. Education is expected to be a process which prepares us to lead such a life. And only with such an expectation, a human being invests nearly one-fourth to one-third of one' lifetime in the process of being educated. While going through education, if we have the opportunity to get a holistic perspective about life and existence, the decisions taken by us will open channels for a happy and prosperous life. At this stage of life, while completing one's education, it is needful to gain clarity about what we really want to be, and to acquire competence to actualize it in life, visualizing clearly how one would like to see oneself, say, twenty years hence and further.

Take the case of relationship. Harmonious relationship is one important aspect of a happy life. Today, with fast life and changing social structure, sustaining harmonious relationships has become a challenge. Another important aspect is physical well-being and wealth. As you enter higher education, you may have two major milestones in front of you: career and marriage. Can there be some programme which can help you choose your career and spouse prudently? These are issues which may be of concern to each one of you. Further, all of us live in a society. We are anyway related to the society. In fact, we are related to the whole world around us. We want fulfilling relations with all.

Even if there is a single relationship in which we find it difficult to ensure mutual happiness or mutual fulfilment, there appear to be only two options before us: either to ignore and forget the other or to feel stressed. Both of these options do not provide a mutually fulfilling solution. Can our education address such issues? Most of the time, it is found that youth read various books, discuss with friends, listen to talks and discourses to seek solutions to such issues which, at times, start appearing unsolvable.

As a result, many of us are compelled to adopt piecemeal solutions, but that too has its own limitations. Our society is of prime concern to us as our job or career or family are strongly connected to the society. When we get to know about negativity in day-to-day incidents around through the newspaper, news channels or social media, we start feeling more and more insecure and fearful. But this is not what we desire. Just ask yourself – do you want a fearful society or a fearless society? What is naturally acceptable to you? What is it that you aspire for?

Next comes the Nature around. We do feel agonised when we hear that pollution is rising, Earth's atmosphere is becoming warmer and warmer day by day, water table is going down, sea level is rising and coastal areas are sinking, food is getting contaminated, etc. Nowadays, we keep getting such messages on our gadgets every day. Certainly, this is neither good for us, the human beings, nor for the rest of the nature.

It may also be observed that on this Earth it is only the human being which goes through a long process of education, in the family, in the formal educational system and in the society. Formal education has been accepted as a basic human right; parents are motivated to send their children to schools and colleges; there is adequate institutional and learning infrastructure; teachers have been appointed and students are coming in fair numbers. All this effort has resulted in significant development of skills and information. Yet, it is the human being only who is creating so many problems on this planet. If one does not feel fulfilled within oneself, (s)he

cannot be fulfilling for others too. What remains to be addressed adequately in the present education system is this important aspect, i.e., fulfilment in human being.

As a human being, we have two important questions to resolve:

1. What to do?

2. How to do it?

A holistic education basically has to address both these aspects adequately.

R.M.K GROUP OF INSTITUTIONS

The domain of education which addresses the issues related to 'What to do?' is called Value Education.

It gives us the clarity of our goal, our basic aspiration and the programme to fulfil the basic aspiration.

The second domain which addresses the issues related to 'How to do?' is called Skill Education.

It helps us learn skills, methods and techniques to implement the programme. Both are essential and complementary components of education, and need to be addressed properly.

1.1.2 Value Education

When we try to fulfil our relationship with other human beings or any entity in the rest of nature, that defines my participation with the larger order. This participation constitutes the domain of human values.

The value of an entity is its participation in the larger order of which it is a part.

For example, the value of a marker is that it can write on a whiteboard in the classroom. Here writing is the participation of the marker in the classroom, which is the larger order. As long as the marker can write, it is of value, otherwise, it is not of value. Similarly, one value of a vegetable plant is that it can provide nutrition to the Body of a human being.

What is the value of a human being then? This question implies – what is the participation of a human being in the bigger order? For example, if your participation in the process of education is to understand what is being taught, your value is to make that effort.

The value of a human being is its natural or expected participation in the larger order – at the level of the individual, at the level of family, at the level of society and ultimately, at the level of nature/existence.

R.M.K GROUP OF INSTITUTIONS

It is interesting to note that **you feel happy in the process of fulfilling your participation in the larger order.** In this example, if you understand what has been taught, you feel happy. The teacher also feels happy when you participate in understanding what is being taught.

For human being, this bigger order includes other human beings, plants, air, water, soil, animals, birds, etc., i.e., the entire nature/existence. The value of a human being is its participation in this entire nature/existence. Hence, to understand human values, we need to study the human reality along with all that is there in the entire nature/existence which constitutes the larger order. The role of human being is to understand and fulfil its relationship with each and every unit in the existence.

To understand human values, there is need for value education. We need to explore and understand things as they are; so that we are able to fulfil our participation with them.

The part of education that deals with the understanding of one's participation in the larger order, and thus ensuring it in living, is called as Value Education.

It forms the basis of the rest of education as well. Ultimately, the whole education needs to be value based. If it is not value based, it will not serve to fulfil the basic aspiration of the human being, i.e., a life of fulfilment.

It can at most provide skills to a person to fulfil the need for physical facility, or so to say, make money, but the basic desire will remain untouched.

A simple appraisal of the current state of the affairs shows that our life has become more focused on making money rather than ensuring a fulfilling life. This deficiency needs to be rectified by making education wholesome and conducive to a fulfilling life.

1.1.3 Skill Education

Skills (technology, management, medicine, etc.) are necessary in our life. Skills have been developed to such a fine extent in every area – in medicine, in production, in construction of bridges and buildings, in all kinds of transportation from bicycles to aeroplanes, in telecommunication and television, to name a few.

R.M.K GROUP OF INSTITUTIONS

The list is very large. Skills are definitely required. However, along with skills, it is essential to decide the purpose for which they are to be used.

Complementarity of Values and Skills

Let us reflect upon a few questions to understand the complementarity of values and skills: Will you use your communication and management skills for dominating over others or for mutual fulfilment, making friends?

Will you use your medical skills for profiting from disease or for ensuring long-term health? Will you use your finance skills for ensuring equitable distribution of wealth or for profit-maximisation for a few? Will you use skills for nurturing others or for exploiting others and exploiting nature? Will you use the communication facilities that have been developed, particularly the mobile phones with extensive options, for providing human education to the people or for promoting consumerism and indulgence? We can see that skill is important, but it is more important to see the purpose the skill is used for.

We can see that skills are only a means to achieve a given purpose.

While skills are required to achieve a particular purpose in an effective and efficient manner, it is not within the scope of technology, management, medicine, etc. to decide the purpose. This decision lies outside its scope. It thus, becomes important to identify our purpose as human beings. Without this decision, skills can be aimless, direction-less and can therefore, be put to any use – for constructive or destructive purposes.

For instance, students of technology will be studying, creating and implementing technologies. If they are getting trained on technology without deciding the purpose of human being, their technical skills could even prove counterproductive when used to dominate, exploit or harm others. We developed technology for harnessing atomic energy or nuclear energy. Now, how much of it has been used for welfare purpose and how much of it has been used for destructive purposes? It seems that we have generated enough nuclear weapons to destroy this Earth 30 times (needless to say that one cannot destroy the Earth more than once).

Taking another example – supposing we get convinced that for a happy life, the health of the Body is the basic requirement, we will learn skills to keep the Body healthy. Skills such as learning which food will keep the Body healthy which physical practices will keep the Body functioning properly, what would be the possible ways to do certain kinds of work with the Body? All these falls under the domain of skills. But along with it, it is crucial to understand for what purpose we shall be using our body; and this comes under the value domain.

As explained above, values and skills have to go hand in hand. There is an essential complementarity between the two for the success of any human endeavour towards the goal of living a fulfilling life.

1.1.4 Priority of Values over Skills

As elaborated above, values are required to decide "what to do", while skills are required for "how to do". Now, when we ask ourselves what would be the priority order, it is easy to see that "what to do" has to be decided first and then only we can think of "how to do" rather than the other way around.

For example, if you were to go to a railway station and ask for a ticket, the clerk would ask you where you want to go. But if you keep telling the clerk that you want the fastest train, the most comfortable train, the best air conditioned train and all that, will it work?

That is how many of the things we are doing today are happening! We are working out ways and means to go fast, to travel at supersonic speeds, but are we clear about where we want to go and what we will do when we reach there; and if that will lead to our fulfilment or not? This is an important question that must be kept in the forefront of whatever we think and do.

1.1.5 Development of a Holistic Perspective

The outcome of value education is a holistic perspective with the clarity about human being (the one who understands), about the nature/existence of which we are an integral part as well as our participation in this nature/ existence. This participation is our role, it is our purpose, it is our right, it is our responsibility and it is our value. In terms of day-to-day living, it means that we are able to see our role with respect to ourselves, with respect to the family, with respect to the society and with respect to nature/existence **(Fig.1.1)**.

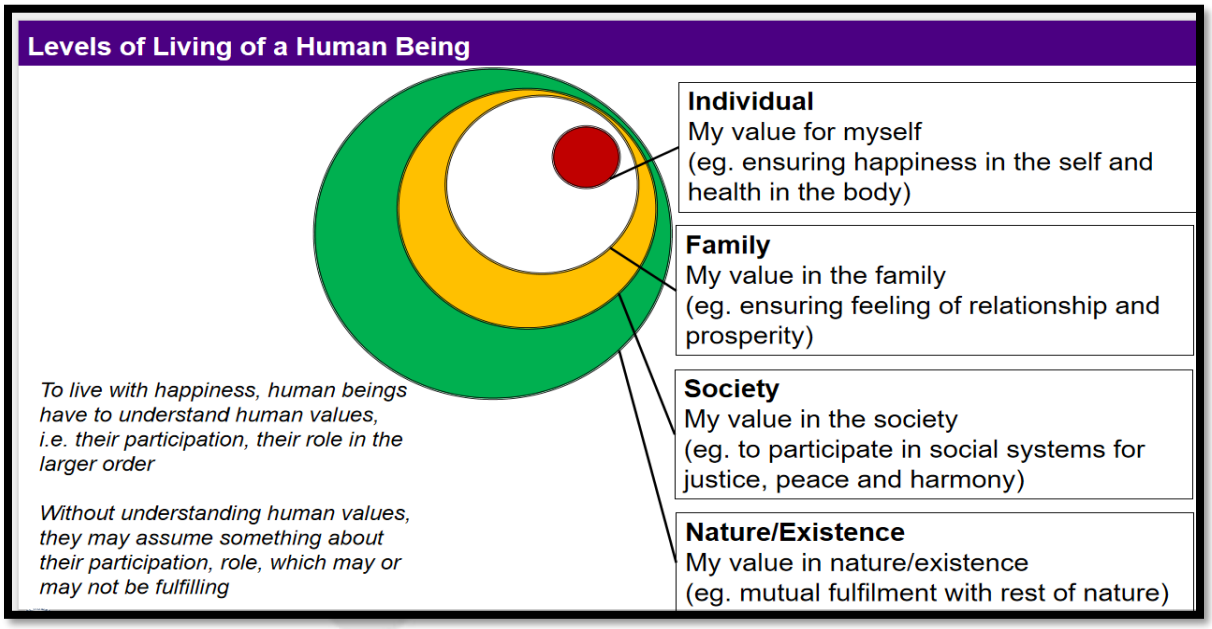

Fig.1.1

We are interconnected, interrelated in this existence – from the smallest level to the whole cosmos. There is a chain of connectedness with mutual fulfilment at every level. With a holistic perspective we are able to see every little part of it. We can also see that our own existence is by virtue of this mutual fulfilment. It is the same for other human beings as well as all the units in nature, like air, water, plants and animals. The rich bio-diversity is fulfilling for us and is readily available to us without any effort from our side. It is like a gift of mutual fulfilment. All the wisdom, information and skills which the long human tradition has developed are also readily available to us without any effort from our side. This also develops a deep sense of gratitude for the society and ultimately for the whole existence.

1.1.6 Guidelines for Value Education

Now that we have identified the need and implications of value education, let us visualize certain effective and widely acceptable guidelines which will enable the introduction of value education in the present academic system.

Given below are the broad guidelines:

Universal

Whatever we study as value education has to be universally applicable to all human beings and be true at all times and all places. This implies that it should not change depending upon sect, creed, nationality and gender, etc. It has to deal with universal human values.

For example, the feeling of respect in relationship is something universal, so it can be a part of value education.

Rational

It has to be amenable to reasoning and not based on dogmas or blind beliefs. It should be open to address the related questions. It cannot be a set of sermons or do's and don'ts.

Natural and Verifiable

We want to study something that is natural to us. Being natural means, it has to be acceptable in a natural manner. When we live on the basis of such values that are natural to us, it leads to mutual fulfilment. It leads to our happiness and it is also conducive to the happiness of other people we interact with, as well as enriching for other units in nature. We also want to verify these values ourselves, i.e., we don't want to assume something just because it is being stated here; rather, each one of us wants to verify these to find out whether they are true for us. This can be done by both checking for validity within ourselves, as well as something which we can implement in our living and observe its outcome.

R.M.K GROUP OF INSTITUTIONS

All Encompassing

The content of value education has to cover all dimensions of our being (thought, behaviour, work and understanding) as well as all levels of our living (individual, family, society and nature/existence). It is not merely an intellectual exercise or information transfer.

Leading to Harmony

Finally, value education has to enable us to be in harmony within and in harmony with others. Hence, when we live on the basis of these values, we start observing that it leads to harmony in us and harmony in our interactions with other humans and the rest of nature.

Content of Value Education

We have seen that the value of a human being is the participation of the human being in the larger existential order. Hence, to understand human values, we need to study human being along with all that is there in the existence. The role of human being is the relationship with each and every unit in the existence. That means the scope of study has to be all encompassing, i.e.**Covers all levels of living**: (Refer **(Fig1.1))**

Individual (human being)
Family
Society
Nature/Existence

Covers all dimensions of human being – thought, behaviour, work and realisation.

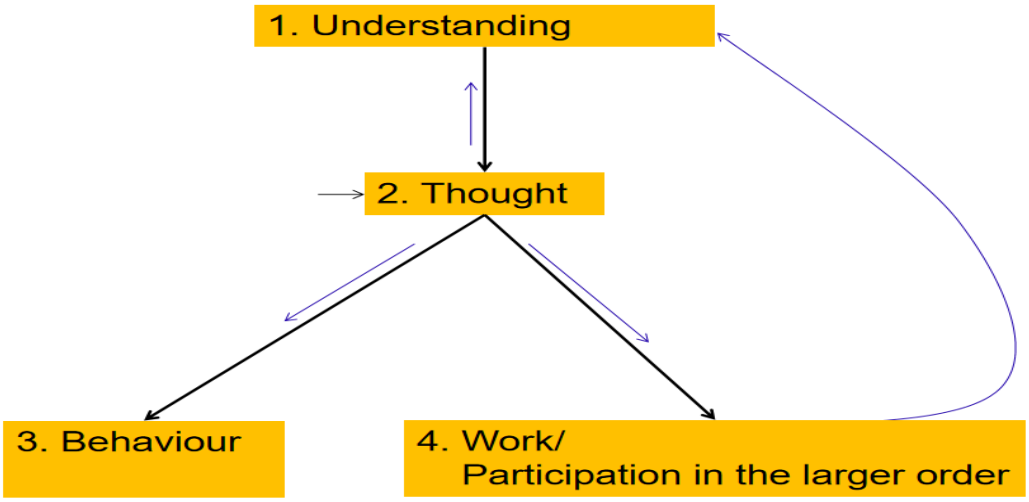

Fig.1.2

Accordingly, the content of Value Education has to be to understand human being, human aspirations, happiness; understand the goal of human life comprehensively; understand the other entities in nature, the innate inter connectedness, the harmony in the nature/existence and finally the role of human being in this nature/existence. Hence, it has to encompass understanding of harmony at various levels, namely, individual, family, society, nature and existence, and finally, learning to live in accordance with this understanding by being aware of one's thought, behaviour and work.

1.1.7 Process of Value Education – Self-exploration

Human Values can be understood by an appropriate process of self discovery, because they are potentially there in each and every human being. There is already a natural acceptance for values in a human being. It is only that we have to discover them or become aware of them. For example, if you are asked, what is naturally acceptable to you: the feeling of relationship or feeling of opposition with other members of your family? Just observe within for the answer. The natural response is feeling of relationship.

This feeling of relationship is a value for us. In this discussion, this feeling was not created in you. You already had the acceptance for it. It was only uncovered by drawing your attention within though the question for exploration. Hence, to study human values, the process has to be such that

it develops a process of self-exploration in you. Taking every statement as a proposal, you are able to investigate the reality by yourself.

Value education is not a set of do's and don'ts or a set of sermons. It rather is a process of self-exploration and self-investigation. This will be further elaborated in the next lecture.

R.M.K GROUP OF INSTITUTIONS

1.1.8 What is Self-exploration?

Self-exploration is a process of seeing the truth about a reality on our own right, by our own observation and investigation. Through this process, we understand the reality and our participation (value) with it.

For instance, human being is a reality. Through self-exploration we try to see and understand the human being as well its participation (value) with other human being. Our articulation of human being and our role (value) with other human being is just a proposal for you – to explore, see and verify for yourself.

You can find out which process is more acceptable, more assuring for you:

- **A process of self-verification, self-exploration on your own right**
- **A process of assuming what is given, without verifying on your own right**

It is for you to decide what a reality is and what your role (value, what is

valuable) with that reality is. Whatever is given in the book is just a proposal for you for your self-verification, self-exploration.

The simplest way to verify a given proposal on your own right is by referring it to your 'natural acceptance'. If the proposal is naturally acceptable to you, it is right for you. If it is not naturally acceptable to you, it is not right for you.

If you ask yourself, what is naturally acceptable to you – 'to be in relationship with your family members?' or 'to be in opposition with them?' The answer may be quite obvious and you would come up with a spontaneous 'to be in relationship'! How did you get this answer? It is from your natural acceptance.

When we refer to our natural acceptance, we directly get the answers. We don't have to learn them or get them from outside or refer to some instrument! Sometimes, we might be in opposition with someone, even with our family members, but that is not naturally acceptable to us.

R.M.K GROUP OF INSTITUTIONS

With a feeling of opposition within, we feel uncomfortable within and want to resolve the situation. It is the feeling of relationship only that we always aspire for. Regardless of whether we are living in relationship or opposition, our natural acceptance is always for relationship.

We are referring to this faculty as our natural acceptance. It is innate in us, a part and parcel of our being.

Each one of us has this faculty and therefore, all of us have the potential for self-exploration on our own right. We do not need any special qualification

for it. We only have to start referring to our natural acceptance.

As you explore, verify the proposals you are able to distinguish between what is right for you and what is not – what is valuable for you and what is not. E.g., by now you would have been able to verify that the relationship is naturally acceptable to you and opposition is not.

This self-exploration is a process of dialogue. To begin with, it is initiated as a dialogue. Soon you start asking such questions to yourself – it becomes a dialogue within you. You start exploring the answers for your fundamental questions by referring to your natural acceptance. This internal dialogue is between

"what I am" and "what is naturally acceptable to me" **(refer to Fig1.3)**

The Dialogue Within

This internal dialogue is between the two realities **"what I am" and "what is naturally acceptable to me". "What I am" is my current competence on the basis of which I live. It includes the way I feel, the way I think, how I make decisions, what I expect from others and all that. It has to do with my desires, thoughts, expectations etc.**

"What is naturally acceptable to me" is my natural acceptance. It is my intention. It is "what I really want to be". It is a basic reference which is a part and parcel of me.

R.M.K GROUP OF INSTITUTIONS

Be aware of "what you are". Similarly, check if you are aware of your natural acceptance. Now, if you want to be aware of your own desires, thoughts and expectations or your natural acceptance, where would you look? You have to look within!

When you are able to see both these realities, you can find out if they are same or they are different, whether they are in harmony or they are in contradiction.

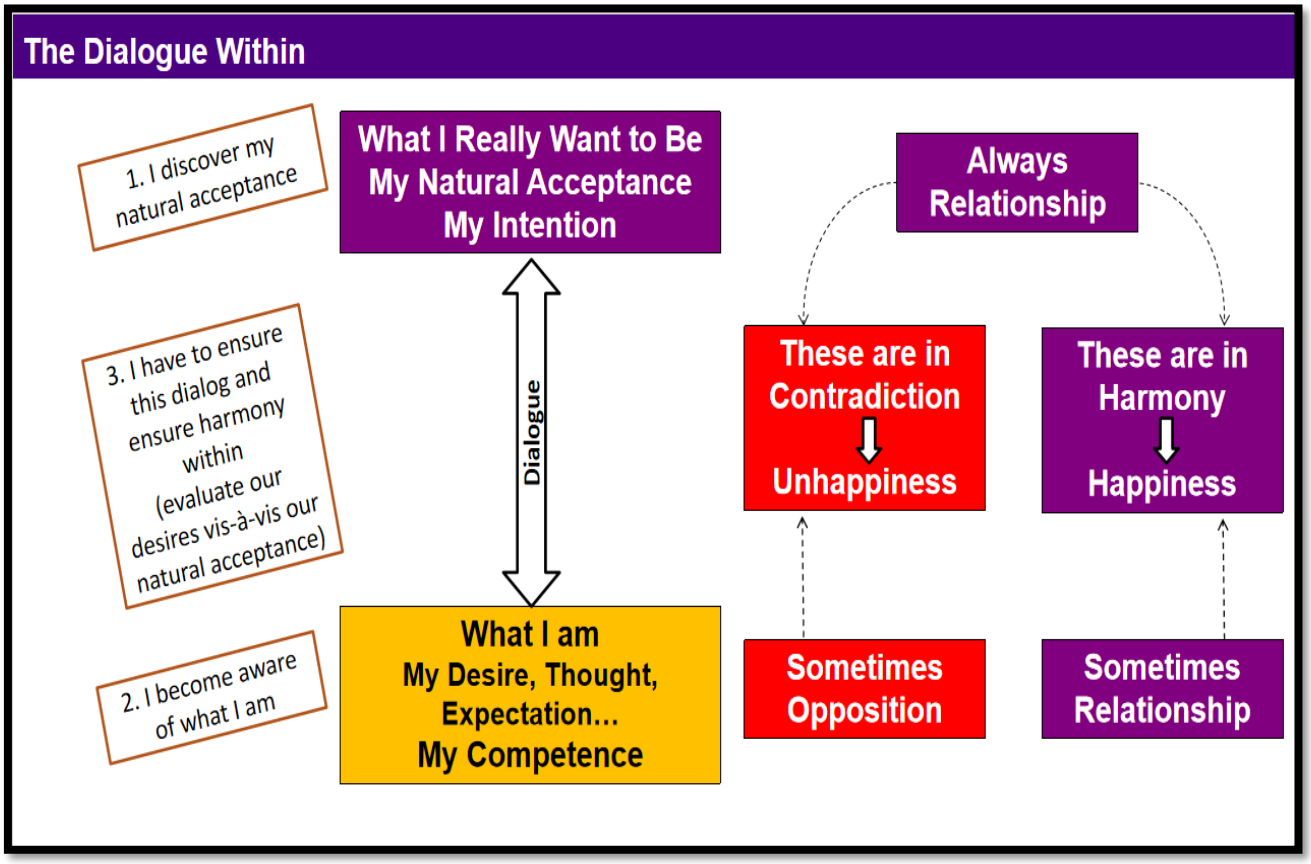

Fig.1.3

In general, a contradiction between "what I am" and "what is naturally acceptable to me", will result in disharmony within me. Only when "what I am" and "what is naturally acceptable to me" are in harmony, we are comfortable within.

1.2 Self-Exploration- Its content and process; 'Natural Acceptance' and Experiential Validation- as the process for self-exploration

It is a process of seeing the truth about a reality in our own right, by our own investigation, observation, and analysis. Through this process, we should try to understand the reality that exists and our participation with it, which we are calling values. It is for us to decide what is valuable for us and what is not. Whatever is given in the course is just a proposal for us for our self-verification.

- **What should be the content for self-exploration?**

Whatever is essential for us to understand for moving towards a fulfilling life should naturally form the content for self-exploration. Thus, the content for self-exploration basically has the following two sub-parts:

- a) Desire: What is our basic aspiration?
- b) Programme: What is the way to fulfill this basic aspiration?

- First, we want to explore our desire as a human being, and second, we want to explore into the programme to ensure the fulfillment of that desire.
- The desire is essentially the basic aspiration, the aim, the objective, the purpose, what we want to achieve? – what is our goal?
- The programme is the process of achieving the desire, the action to achieve our goal.

R.M.K GROUP OF INSTITUTIONS

The Process of Self-exploration

- Whatever is stated here is a proposal, do not assume it to be true or false, right, or wrong. Verify it – verify it on our own right, based on our natural acceptance. However, verifying it based on natural acceptance is only a part of the process. Fig 1 represents the complete process of self-exploration.

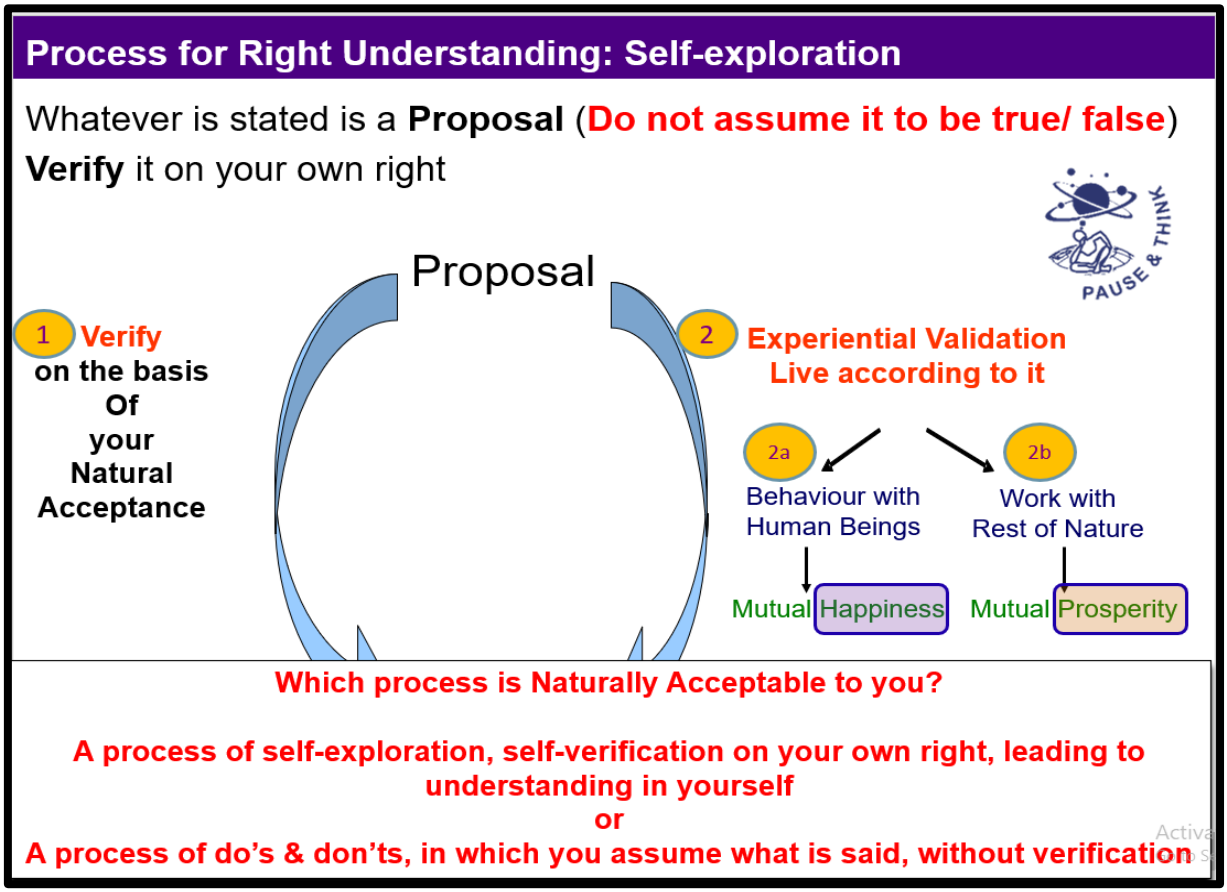

Fig.1.4

Explanation

- The first part of self-exploration is to verify the proposal based on our natural acceptance. Once we have verified that a proposal is naturally acceptable to us, we are sure that it is something which we would like to live with.
- The second part of self-exploration is experiential validation. It means trying to live according to the proposal. In living there are two parts – one is the behavior with other human beings and the second is work with the rest of nature. When we are behaving with human beings based on this proposal, we want to verify whether it leads to mutual happiness or not. If it leads to mutual happiness, it is a right proposal; if it does not lead to mutual happiness, it is not a right proposal. Similarly, when we are working with the rest of nature, based on this proposal, we want to verify whether it leads to mutual prosperity or not. If it leads to mutual prosperity, it is a right proposal; if it does not lead to mutual prosperity, it is not a right proposal.

Example

- As an example, let us explore the proposal, "the feeling of respect is natural in a relationship". As a first part of the exploration, you can verify whether feeling of respect is naturally acceptable to you or feeling of disrespect is naturally acceptable to you. This is part one of the self-exploration.
- The second part is living according to the proposal. That is, you have the feeling of respect in you, and now, you are expressing this feeling of respect in your behavior with the other human being. Let us find out whether it leads to mutual happiness or not. If it does, the proposal is a right proposal, otherwise it is not. I can see that this feeling of respect is naturally acceptable to me, therefore, it leads to my happiness.
- Similarly, this feeling of respect is naturally acceptable to you, therefore, it leads to your happiness as well, i.e., it leads to mutual happiness, and hence the second part of the self-exploration also holds true. Putting these two parts together, now we can say that the given proposal "the feeling of respect is natural in a relationship" is a right proposal.

R.M.K GROUP OF INSTITUTIONS

- We can also verify this in case of our interaction with the rest of nature. Let us check whether 'the feeling of nurturing (enrichment) in our interaction with the environment is natural'. You can verify whether feeling of nurturing is naturally acceptable to you or feeling of exploiting is naturally acceptable to you.
- This is part one of the self-verification. Further, we can proceed to the second part of self-exploration – living according to it. By nurturing and enriching the environment, does it lead to mutual prosperity?
- If we can see that the enriched environment facilitates better food production, leading to our prosperity and it also leads to prosperity of the environment in terms of its enrichment, we can conclude that it leads to mutual prosperity. Thus, this proposal passes both parts of self-verification. Therefore, this proposal 'the feeling of nurturing the environment is natural' is a right proposal.
- What we are verifying for any proposal in the second part is, "does it lead to mutual fulfillment in our living"? Mutual fulfillment means that:
- a. Our behavior with other human beings leads to mutual happiness.
- b. Our work with the rest of nature leads to mutual prosperity.
- At this point, there may be a question, "is it necessary to experientially validate a proposal if it is not naturally acceptable"? It is an important question. What is being said here is that both parts of self-exploration are essential. We may not be very sure of our natural acceptance, or we may not have the confidence that we really have the right answers within (that we can really be self-referential). So, we propose that you experientially validate the proposals. Of course, if you are very sure that a proposal
- do not pass the first test, you need not go to the second test.
- When we can verify a proposal, both by way of verifying through natural acceptance and by way of verifying through experiential validation, the ultimate outcome is "right understanding".

R.M.K GROUP OF INSTITUTIONS

1.2.1 Natural Acceptance

Natural acceptance has to do with something fundamental, something related to our purpose, something related to our basic desires. When we ask a question related to these, we get a definite answer from our natural acceptance. For example,

- Is happiness naturally acceptable or is unhappiness naturally acceptable?
- Is it naturally acceptable to live in relationship or in opposition?
- What is naturally acceptable – to nurture your Body or to exploit it?

For all these questions, we get a definite answer when we refer to our natural acceptance.

Some of the characteristics of natural acceptance are:

a. Natural acceptance does not change with time:

What is naturally acceptable to you today is the same as what was naturally acceptable to you yesterday, and what will be naturally acceptable to you tomorrow.

For example, our natural acceptance for the feeling of trust, for the feeling of respect in relationship remains invariant with time: a child naturally accepts having the feeling of trust. Twenty years later, when (s)he becomes a youth, (s)he still has a natural acceptance for trust; and when (s)he grows into an old person, (s) he continues to have a natural acceptance for the feeling of trust –

- there is no change in the natural acceptance with time for any given person.

b. Natural acceptance does not change with place:

Naturally acceptable feelings, like trust, respect, affection, etc. remain invariant with place. These feelings are naturally acceptable to me when I am in India, in America, in Africa, in Europe or in any other place. Like that, my natural acceptance to keep the Body healthy does not change with place. No matter where we are, we have the same natural acceptance at all the places.

R.M.K GROUP OF INSTITUTIONS

c. Natural acceptance does not change with the individual:

Natural acceptance is the same for all of us; it is a part and parcel of every human being; it is part of our humanness. We can check with the naturally acceptable feelings once again and find out if they are naturally acceptable to Indians, to Americans and to any and every human being. Our assumptions, our likes and dislikes, our views on issues may vary; but the feelings that are naturally acceptable to one is also naturally acceptable to every human being. In that sense, natural acceptance is universal. That is why by understanding our own natural acceptance; we can also understand the natural acceptance of others.

d. Natural acceptance is uncorrupted by likes and dislikes or assumptions or beliefs:

We have taken the examples of this above also. When we ask the right questions, we can see our natural acceptance and it is there. Natural acceptance remains unaffected by our likes and dislikes, our belief systems and our preconditioning even if they are very deep and influence our thoughts day and night.

For example, even if we are preconditioned for years 'not to trust anyone', if we ask the question as to what is naturally acceptable 'Trust or mistrust', the answer is in favour of trust.

Our natural acceptance is innate in each of us; it is uncorrupted and it is universal, i.e., it is invariant with respect to time, place and person.

It may seem very simple to begin with, but we shall see that this becomes a very powerful way for us to know what is ultimately true for us on our own right. All we have to do is to start referring to it and validating it in our living. Since we have so many strongly held beliefs, we may confuse them with our natural acceptance. The experiential validation gives us another opportunity to examine the proposal. That is why both the part of self verification is essential.

R.M.K GROUP OF INSTITUTIONS

1.2.2 Distinguishing between Acceptance and Natural Acceptance

Our acceptance may be based on likes and dislikes, assumptions, pre conditionings, beliefs, world-view, perspective, etc.

Let us say, you like the taste of a particular food item, you have an acceptance for it.

To check if this acceptance is same as your natural acceptance, you can ask a more fundamental question 'will this particular food nurture the body or not'. If you find that it will not nurture the body, you can conclude that particular choice of the food is not in line with your natural acceptance

– your acceptance for that particular food is not your natural acceptance.

Like that we may develop acceptance for many things which are not naturally acceptable to us at a fundamental level. We may have an acceptance for competition, exploitation while our natural acceptance is for cooperation, nurturing.

We might have accepted 'struggle for survival, survival of the fittest', but our natural acceptance is for relationship. We have a natural acceptance for peace, but we might have an acceptance for war…

R.M.K GROUP OF INSTITUTIONS

1.3 Continuous Happiness and Prosperity- A look at basic Human Aspirations

Development of Human Consciousness

The basic aspirations of human being, i.e., happiness, prosperity and its continuity, are fulfilled by right understanding, relationship and physical facility, in that priority order.

A human being working for all three of them can be fulfilled. Therefore, a human being living with all three is living with 'human consciousnesses'.

On the other hand, if one is living for physical facility alone, one is living with 'Animal consciousness'. While physical facility may suffice for animals, it is not adequate for human being to be fulfilled.

- Now you can find out if development would basically mean development of human consciousness in the human being, or just the development of

Animals living with animal consciousness	They are in Harmony	This is fine
Human being living with human consciousness	They are in Harmony	This is fine
Human being living with animal consciousness	They are in Disharmony	This is the problem

Animals living with animal consciousness, living for physical facility alone, living for food, shelter, etc., are just fine – they are in harmony with the rest of nature! Only when human beings try to fulfil themselves on the basis of physical facility alone, they tend to be in disharmony within and in disharmony with others. The problem is with human being living in animal consciousness. You can see that opposition, struggle, war, etc. is on account of such human beings. You may call this as inhuman-consciousness or something else, if animal consciousness gives a sense of demeaning the animals.

1.3.1 Holistic Development

(Transformation from Animal Consciousness to Human Consciousness)

What is naturally acceptable to you – to live with animal consciousness (inhuman consciousness) or to live with human consciousness?

Where are we now? Living with animal consciousness or human consciousness? Whether this transformation from animal consciousness to human consciousness is desirable or not desirable?

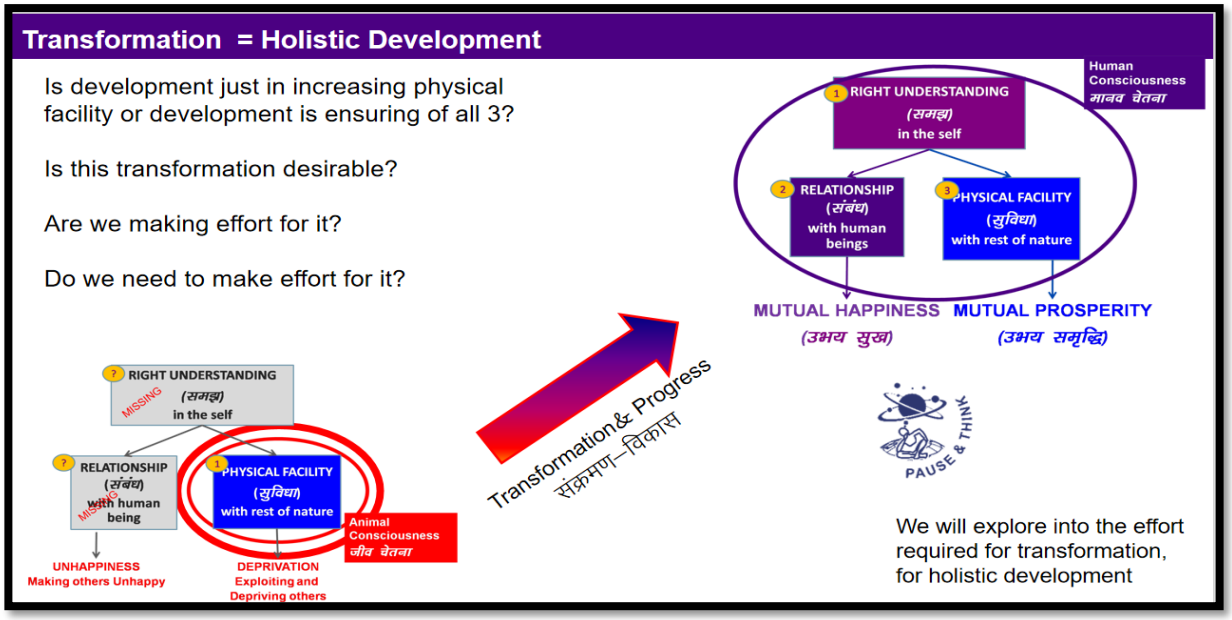

Fig. 1.5

If we see today, the world is largely focused on physical facility as the sole or primary measure of progress and development. Nations measure Gross Domestic Product (GDP) and its growth rate as the key indicators for development. Families and individuals also have a similar notion of their own well-being – they use job position, net-worth, bank balance, the house, the cars and other physical facility as indicators of progress, development and success.

The predominant perception regarding development, success and prosperity is largely to do with accumulation of physical facility – more and more physical facility. This perception is there in the society, in the education system and even in the family.

Like making effort for a salary of ten thousand rupees, fifty thousand, one lakh and so on? Find out if all this is taking you to human consciousness? Is just making the circle of physical facility bigger sufficient for the continuity of happiness and prosperity? Find out if just increasing the quantity and variety of physical facility alone is enough for development.

With right understanding, we can clearly envisage holistic development as the transformation of consciousness – from animal consciousness to human consciousness. It will necessitate working on all three – right understanding, fulfilment in relationship as well as physical facility; and in that order of priority.

1.3.2 Role of Education-Sanskar

(Enabling the Transformation to Human Consciousness)

We are providing inputs to the children in many ways. Starting from the family, the parents and other family members are providing inputs right from day one. The formal education system, i.e., schools, colleges, universities, etc. are also providing inputs. And the society is giving inputs through the role models, through the media and so many other means. All these put together shape the perspective and feelings of a child.

Right understanding, Relationship and Physical Facility- the basic requirements for the fulfilment of aspirations of every human being with their correct priority

Basic Human Aspirations and their fulfilment

All these inputs put together is what we are calling education-sanskar.

Education is developing the right understanding (holistic perspective). Sanskar is the commitment, preparation and practice of living with the right understanding. The preparation includes learning appropriate skills and technology. The role of education is to facilitate the development of the competence to live with human consciousness, with definite human conduct. For this, the education-sanskar has to ensure:

1. Right understanding in every child,

2. The capacity to live in relationship with other human beings, and

3. The capacity to identify the need for physical facility, the skills and practice for sustainable production of more than what is required, leading to the feeling of prosperity.

These are the three components of education-sanskar, if it has to ensure development of human consciousness.

With this, let us see whether we are ensuring all three of them or not in the present-day education-sanskar. We can see that today, in our programs of education,

1. The first one is largely missing (are we teaching the students to explore and know (have right understanding) or to assume and reproduce the content?)

2. The second one is largely missing (are we teaching relationship and cooperation or opposition and competition?)

3. And in the third one, you will see that identification of need for physical facility is missing. The willingness to produce by way of labour is also missing. The core feeling that is being generated is to accumulate more and more, to consume more and more, rather than to produce as per need.

Education provides thought leadership and direction to the society through the preparation of individuals. These long-term potential of human education-sanskar is:

1. Right understanding in every child – by facilitating the development of right understanding, it will lead to living in human consciousness.
2. The capacity to live in relationship – by facilitating the capacity to live with mutual happiness or justice in relationship with other human to the larger family, and ultimately go up to the world family, leading to an undivided society.

R.M.K GROUP OF INSTITUTIONS

3. The capacity to identify the need for physical facility, developing the skills and practice for sustainable production of more than what is required leading to the feeling of prosperity; a mindset of production through labour and of right utilisation of the physical facility. This will ensure harmonious family order and extend beyond the family order through participation by the family members in the larger societal systems; ultimately to universal human order.

The outcomes of human beings living with human consciousness are depicted in Fig.1.6.

This is the proposal about the role of education. If you can see this, you will see that the role of education is essentially to facilitate holistic development, i.e., the individual transformation to human consciousness as well as the societal transformation to universal human order.

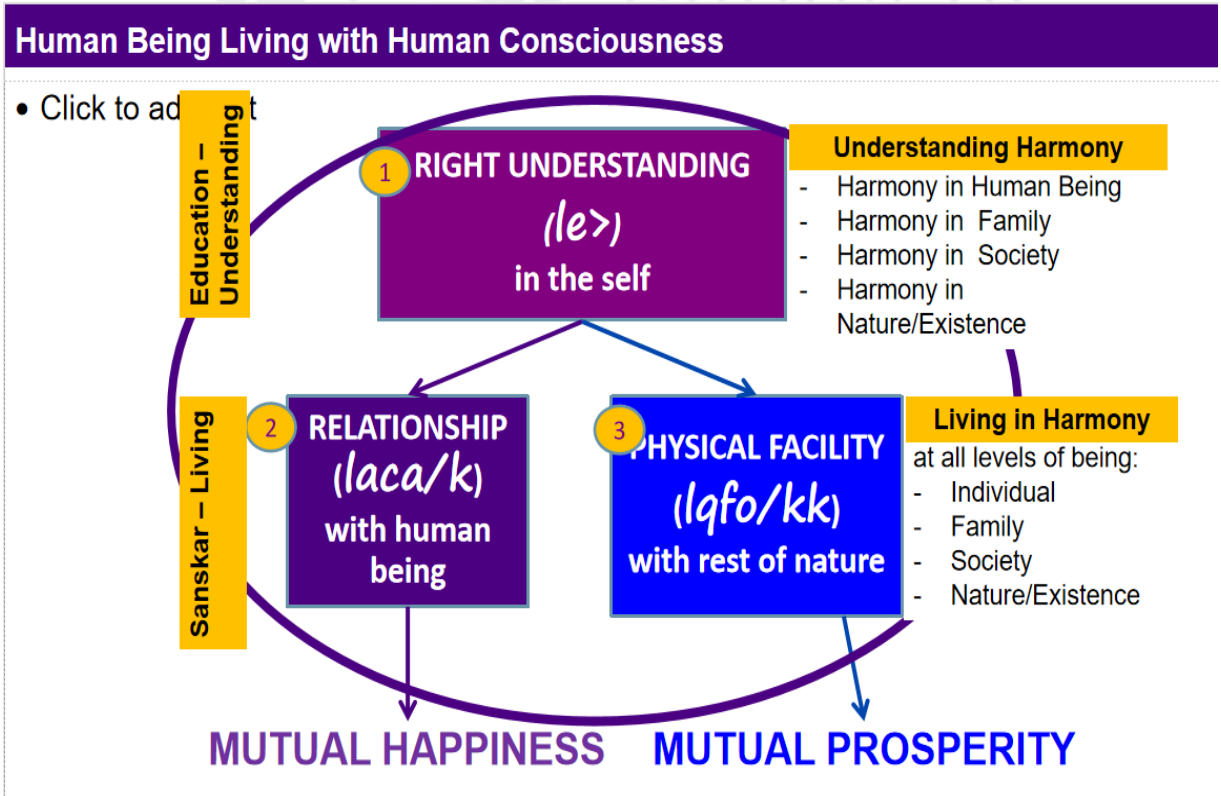

Fig. 1.6

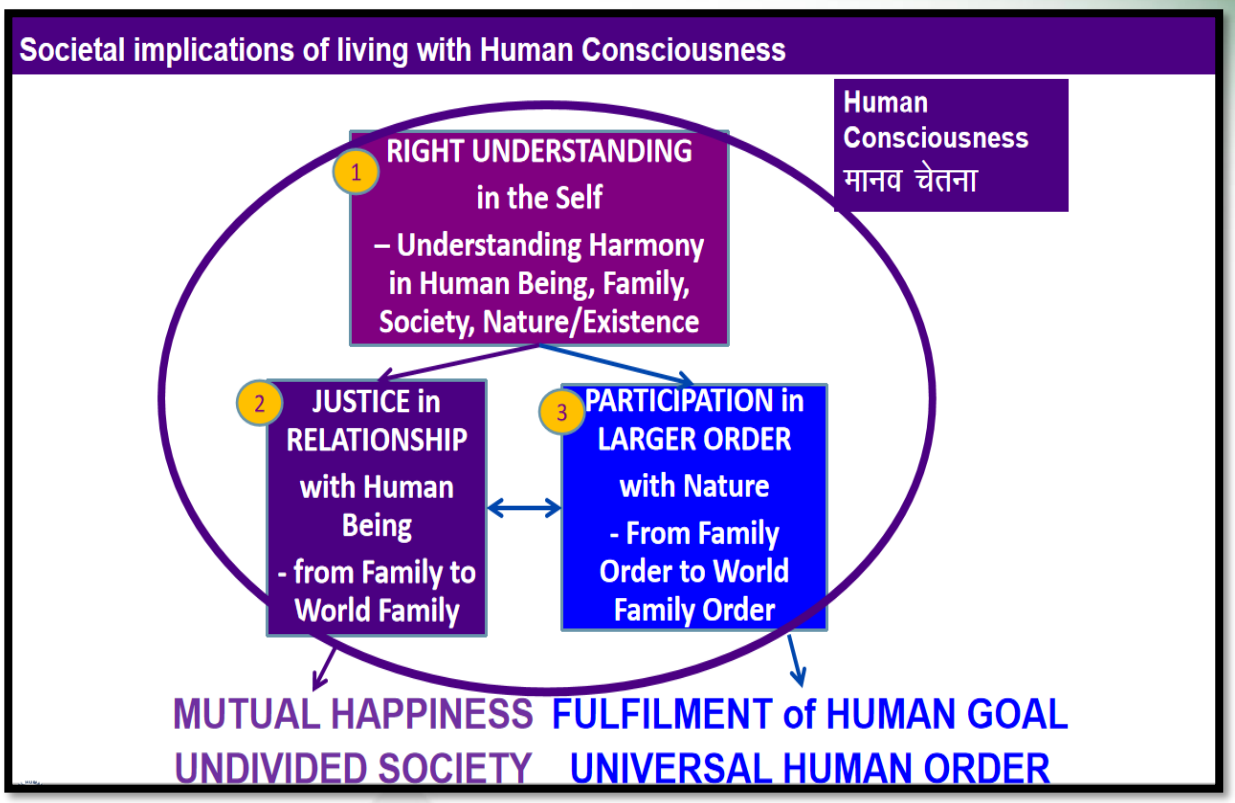

Fig. 1.7

1.1.3 Program for Continuity of Happiness

For the continuity of happiness, we must look into the total possibility of our being. Ensuring harmony in every aspect of living would lead to continuity of happiness. Let us find out – as a human being what is the total expanse of our living?

We live at several levels, starting with ourselves. Then, we live with other people in our family, in the larger society and we are embedded in nature. Whether we are aware of it or not, the expanse of our living is at four levels:

1. As an Individual human being
2. As a member of a family
3. As a member of society
4. As a unit in nature/existence

Let us look at these different levels of our being.

As an individual human being: Each one of us is engaged in ourselves much of the time – in our desires, thoughts, beliefs, imaginations, memories, future plans, etc. No one else is involved.

As a member of a family: We are born in a family, we are nurtured and educated in the family. We live with our brothers and sisters, parents and grandparents, uncles and aunts, cousins and so many people. The family tries to ensure mutual happiness among the members, it takes care of their physical needs, it takes care of the young children, the old and all members in between.

As a member of the Society: Our family, together with other families is part of a larger group of people. We interact with many people outside of our family. In society we produce, use and exchange things like food, clothing, housing, etc. There are systems for education, health, justice, production, and order in society. Our village, town or city is a part of a larger society.

- **As a unit in Nature/Existence:** We are a part and parcel of a large interconnected, interdependent ecosystem along with the air, water, soil, plants, trees, birds, and animals which we call nature. We are inhaling the oxygen rich air and exhaling carbon di-oxide laden air, which the trees consume. Our Earth is one of the many planets in our solar system. Our galaxy is one of the many galaxies. Then there is the all-pervading space. All that exists, units of nature in space, is called existence. We, human beings, are also units embedded in nature/existence.

- We have explored that happiness is to be in harmony. We have also seen that the expanse of our being is these four levels. We can now see that for continuity of happiness, it is essential to ensure harmony at all these levels. To ensure harmony, it is essential to understand harmony.

The programme for ensuring the continuity of happiness is:

- **To understand the harmony at all levels of being and**
- **To live in harmony**

1. At the level of the individual human being
2. At the level of family
3. At the level of society and
4. At the level of nature/existence

1.3.4 Exploring the Meaning of Prosperity

Prosperity is related to material things or what we have been referring to as physical facilities. If you list out all the things that you use, it will probably be a long list. It will include food to eat, clothes to wear, shelter for protection, a mobile phone, a two-wheeler and so many other things. These things are required. When we are able to see that we have more than adequate physical facilities, we feel prosperous.

- Over and above physical facility, prosperity has to do with our feelings. The proposal is:
- Prosperity is the feeling of having more than the required physical facility.
- **There are two basic requirements:**
- **1. Right assessment of the need for physical facility and its required quantity.**
- **2. Ensuring the availability/production of more than required physical facilities.**

R.M.K GROUP OF INSTITUTIONS

- The right assessment of physical needs and their required quantity will come through the right understanding. Without that right assessment, the feeling of prosperity cannot be assured, regardless of the availability or accumulation of physical facilities. We must ensure the availability or production of more than the required quantity. This requires skills, technology, and production. With both, the right assessment, and availability, we have more than the required physical facilities. Over and above that, it is a matter of feeling that we have more than enough.
- **Let us take an example** When we investigate our need for food for nurturing our body, we find that it is required in a limited quantity. Once we can identify the need for food along with the required quantity, we can check whether we already have more than what is required. If we have more than the required food or if we can ensure more than the required food by way of production, we will have a feeling of prosperity as far as food is concerned.
- If we neither have the availability nor the ability to produce more than the required quantity of food, we will feel deprived (as far as food is concerned). Similarly, we can find clothes, mobile phones, etc. When you have a feeling of prosperity, you will naturally think of nurturing and enriching others. On the other hand, if we feel deprived then we think of exploiting and depriving others. By and large, there is a confusion between accumulation of physical facility and the feeling of prosperity. It is generally assumed that the richer you are, the more prosperous you are the more you have accumulated, the more prosperous you are. With this sort of assumption, we pursue prosperity with an obsession for profit, for accumulation. That is happening all around. The major focus in society today is on accumulation of physical facilities. There is a major focus on accumulating money. Today, most of the wealth (money) in the world is owned by a very tiny percentage of people.

R.M.K GROUP OF INSTITUTIONS

Many such people are seen exploiting others, and exploiting the Earth, to accumulate even more. Without clarity about how much is required, the effort is for an unlimited quantity of physical facility, and by almost any means. First the efforts may be by legal means, and then slip to even illegal means. This is all because the quantity required is undefined and there is a feeling of deprivation!

1.4 Right understanding, Relationship and Physical Facility- the basic requirements for fulfillment of aspirations of every human being with their correct priority

- Right Understanding, Relationship and Physical Facility – All Three are Required for fulfillment of Human Being
- For the fulfillment of human beings – physical facility, relationship, and right understanding – all three are necessary (Refer Fig. 2.)

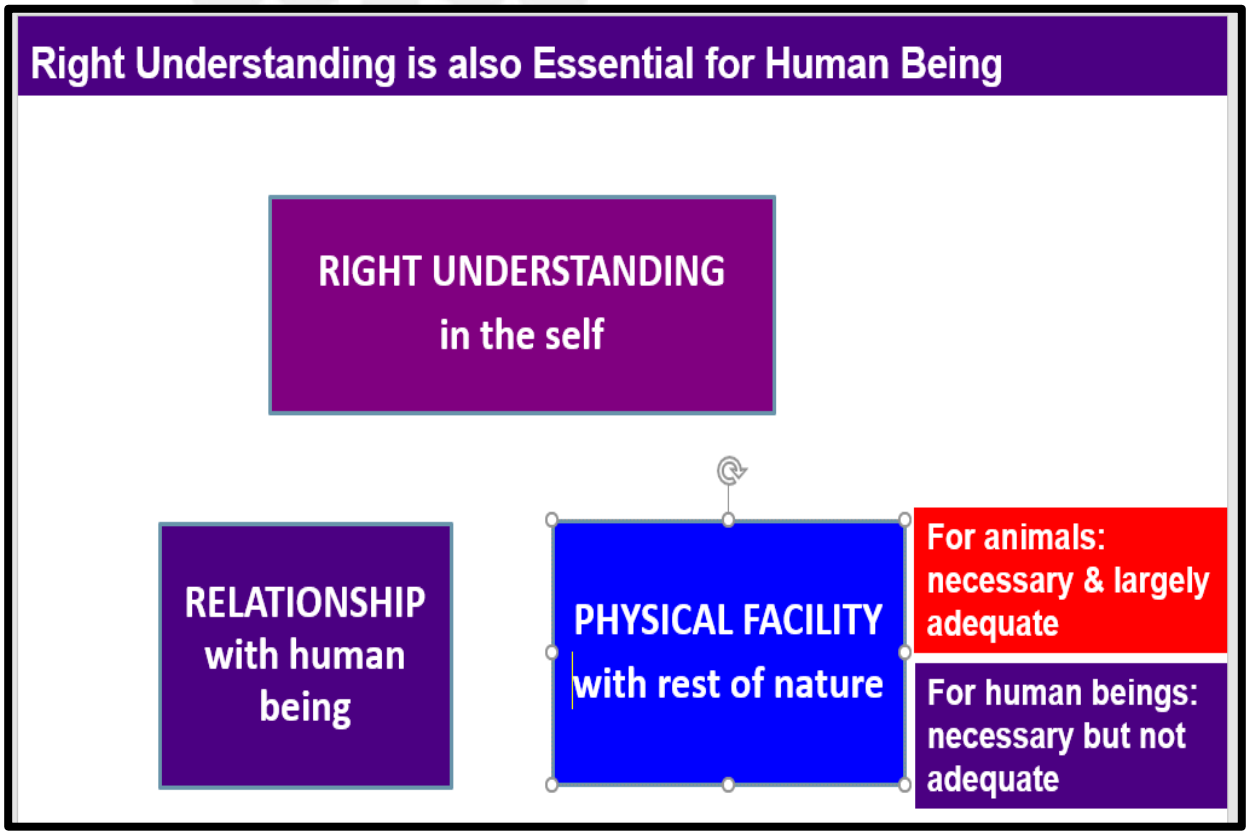

Fig. 1.8

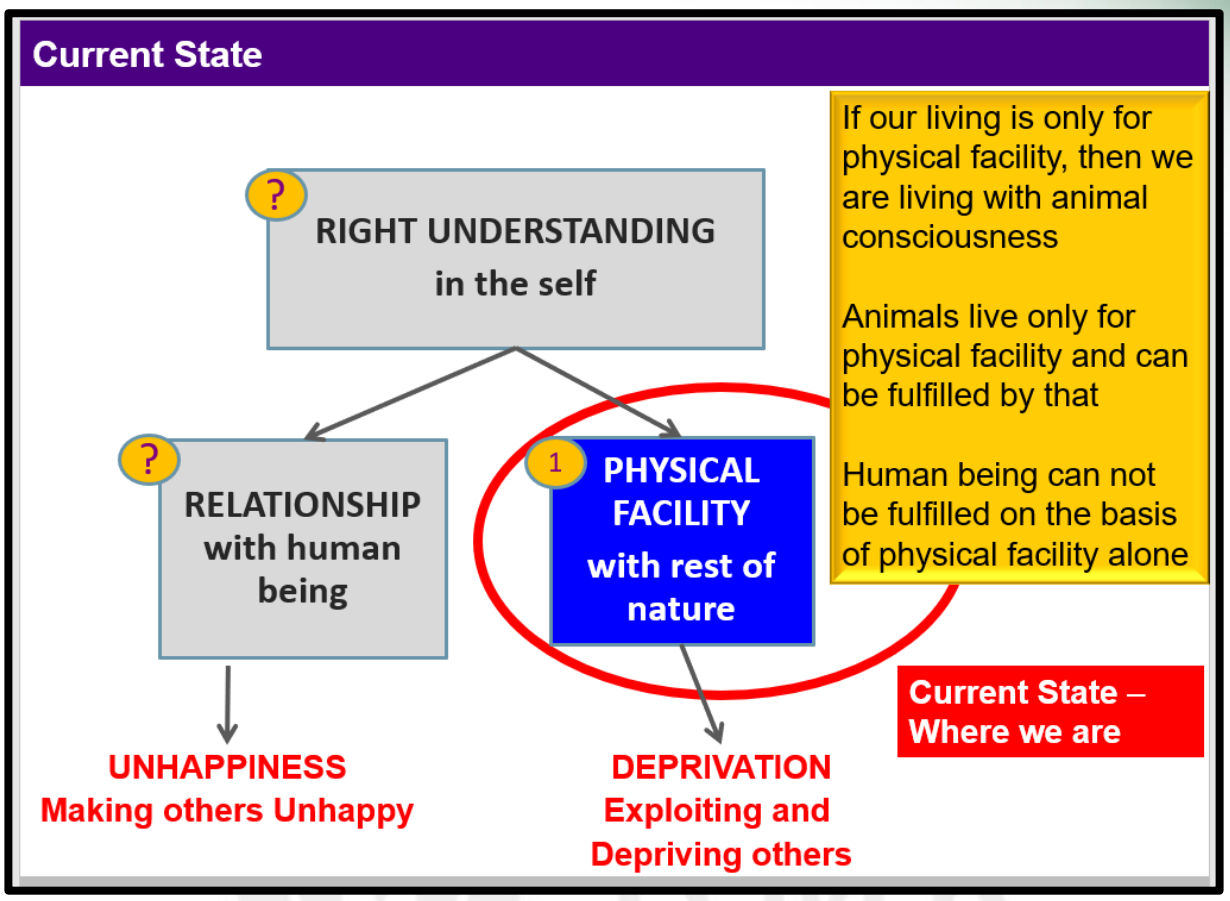

Fig. 1.9

To explore this further, let us look at these situations:

It is hot and humid, and you are sweating. If you switch on an air conditioner, does the cool air from it help? You can see that it makes the environment more conducive, and your body is no longer sweating. The air conditioner and cool air are physical facilities. It is useful for protecting the body from excessive heat.

• Now, you are sitting in that air-conditioned room. A person, with whom you have a feeling of opposition walks into the room. Your body is comfortable with the cool air, but how do you feel within? Comfortable or uncomfortable? With a little exploration you will be able to see that you would feel uncomfortable. It is due to the feeling of opposition that is within you. Check if it would make any difference if you made the room cooler (or warmer)?

R.M.K GROUP OF INSTITUTIONS

After this person has left the room, you are sitting alone but you are still thinking of that person. You have contradictions in your thought. You are thinking about how to resolve these contradictions, but you are unable to. Will you feel comfortable within or uncomfortable within? Once again, you can see that you will be uncomfortable within, regardless of the temperature of the air conditioner.

Without the requisite knowledge, the right understanding (of relationship and the feelings in relationship) can you resolve these contradictions? Can any amount of physical facility resolve these contradictions in you?

We can see that physical facility, relationship and right understanding are three distinct realities. When we look them in more detail, we can see that:

- **Right understanding (in the Self) is understanding myself, understanding all that I live with (the entire existence) and understanding my role with respect to all that I live with, i.e., Myself, my family, society, nature/existence.**

- Relationship is essentially the feeling I have for other human beings (in the family, in the society).

- Physical facility includes all things physical. All three are required for the fulfillment of human beings. One cannot be substituted for the other.

Next, let us find out if we are taking care of all three of them or focusing on physical facilities? You can see that we need all three of them, but today the major focus is on physical facilities.

Can we take care of relationships with physical facilities alone? Can we take care of the right understanding with physical facilities alone?

R.M.K GROUP OF INSTITUTIONS

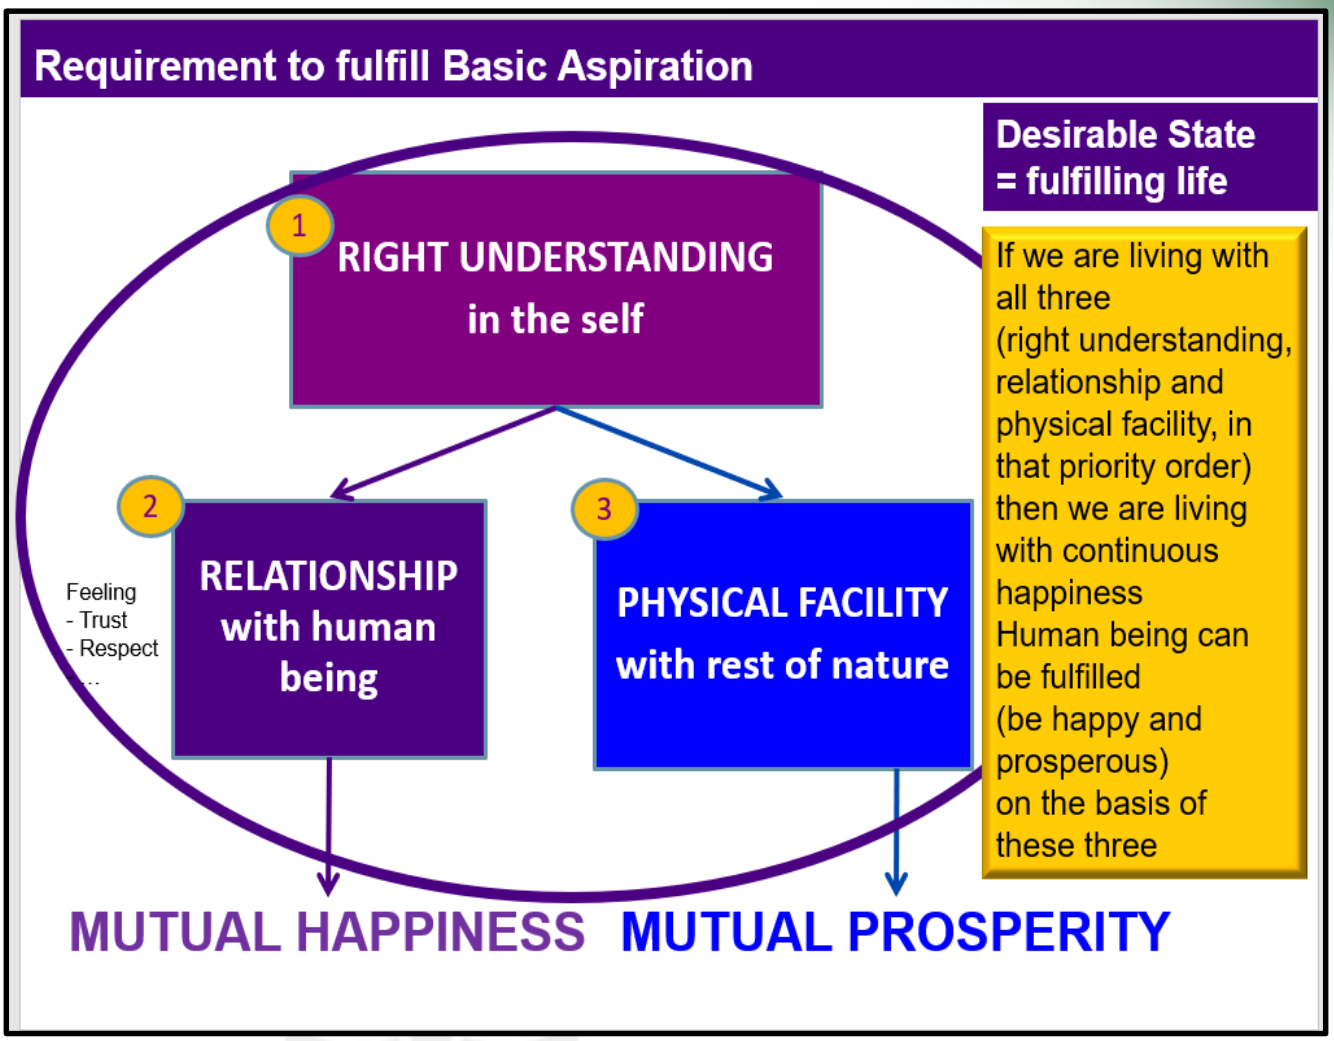

Fig. 1.10

Now, the next question is that if all three of them are required, what is going to be the priority?

Priority indicates what is fundamental, what is the relative importance. Working on the higher priority facilitates the fulfillment of the lower priority. It does not mean that we can do away with the lower priority.

All three of them are required. Right understanding in the Self is a priority because only with right understanding we can ensure fulfillment in a relationship; and we are able to make out how much physical facility is required. Therefore, right understanding is the priority.

R.M.K GROUP OF INSTITUTIONS

The problems in the family are more due to lack of fulfillment in relationships, rather than the lack of physical facility. It indicates that relationships are more important than physical facilities.

It is interesting that out of these three, today, generally we are not taking care of the first priority; we are not taking care of the second priority; the major focus is on the third priority.

Can you see that our major focus is not on right understanding in the Self, not on fulfillment in relationship, but the major focus is on physical facility? And now you can see that if we are not focusing on the first two priorities and we are only trying to work with physical facilities, where will we end up?

If we are only working for a physical facility, the outcome is depicted in Fig. 3 a. At the level of physical facility, we are feeling deprived, and we are making others deprived or exploiting others. When we don't have the right understanding (about relationship) in the Self, we are not able to ensure fulfillment in relationship, therefore, we are unhappy within. When we are unhappy within, are we going to make others happy?

If we don't have the right understanding about relationships, we don't know about the feelings in a relationship. If we have not ensured those feelings in us, we are unhappy within. In that state of unhappiness, we are not able to ensure fulfillment in a relationship – we make others unhappy. This is one outcome.

The other outcome is that if the right understanding is missing, we are not able to identify our need for physical facility. Now, if we are not able to identify our need for physical facility then regardless of how much physical facility we accumulate, we never feel that we have enough. We keep wanting more. This feeling of not having enough is the feeling of deprivation. Now, if we have a feeling of deprivation, will we think of nurturing others or exploiting others?

If we do not know how much physical facility we require, we will never have a feeling of prosperity, regardless of how much we accumulate. The accumulation of physical facilities may go on increasing, but our feeling of deprivation will continue; and, if we feel deprived, we think of depriving others, exploiting others, and accumulating more and more.

R.M.K GROUP OF INSTITUTIONS

If you look around, there are generally two kinds of people today:

1. Those lacking physical facility, unhappy and deprived

2. Those having physical facility, unhappy and deprived

Try to find out where you are – at 1 or at 2?

The whole concept of what is called development today, largely takes us from '1' to '2'. While working for development, we are focusing on a good outside environment, lavish infrastructure, etc.

– is it sufficient for your happiness and prosperity? The nice apartment, 24-hour electricity, running water, laptop, mobile, a big car, wide roads, trains, planes, and all this may be required. However, is it sufficient to ensure continuity of your happiness and prosperity? Through education, if we are focused on that good job just for a high salary and more and more physical facilities, without having clarity on how much is required, it can only take us from '1' to '2'; and it can never ensure happiness, prosperity, and continuity of the two.

Whereas we really want to be is in the following state, i.e.

3. Having physical facility, happy and prosperous.

Find out what is naturally acceptable to you – to be in 1, 2 or 3? It is easy to see that we naturally want to be in state 3 of having more than enough physical facilities, happy and prosperous. However, where are we today – at 1, 2 or 3? And even more importantly, what is our effort for – 1, 2 or 3?

Now, if we can ensure all three, i.e., right understanding, relationship, and physical facility, in that order of priority, the outcome (refer to Fig. 3 b).

• Through the right feeling in a relationship, based on right understanding, we can ensure mutual happiness – happiness for ourselves as well as happiness for others.

R.M.K GROUP OF INSTITUTIONS

With the right understanding, we can identify the need for physical facilities. We can also learn how to produce using a mutually enriching production process. Once we can ensure the availability of more than required physical facilities, we have a feeling of prosperity.

When you can see that you have more than what is required, i.e., you have a feeling of prosperity, you will naturally think of nurturing others and not exploiting them.

Right understanding + Relationship → Mutual happiness

Right understanding + Physical facility → Mutual prosperity

In this way, with the right understanding and fulfillment in a relationship, we can ensure mutual happiness.

With the right understanding and enough physical facility (working with the rest of nature), we can ensure mutual prosperity, mutual enrichment. Therefore, by ensuring the right understanding, relationship, and physical facility, we can ensure happiness and prosperity for ourselves and work for happiness and prosperity for others.

R.M.K GROUP OF INSTITUTIONS

1.5 Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario

- A Look at the Prevailing Notions of Happiness
- In the light of the preceding discussion on happiness, let us take a critical look at the prevailing notions of happiness. One of them is that the continuity of happiness is possible through consumption of physical facilities and enjoyment of favourable sensations. People may go to almost any extent to get the taste of their favourite sensation! It could be some particular type of touch, sound, sight, taste or smell.
    - **(1) Accumulating physical facility**

      Physical facility is required, but it alone does not be sufficient for a human being .

      Dependence on the physical facility, can't give continuous happiness.

Is it possible to ensure continuity of happiness by the consumption of physical facility, and the enjoyment of favourable sensation? Let us study this phenomenon and see what is taking place.

Physical thing → Contact with Body → Sensation (from Body) → Tasted by Self

- If taste is favourable → Happiness (Temporary)

- If taste is unfavourable → Unhappiness (Temporary)

We get happiness, or what appears to be happiness, when we eat our favourite sweet. What is happening is that a physical thing, this sweet, is coming in contact with our tongue. At that point, we can taste the sweet. Taste is a sensation. In case we find the sensation to be favourable, we feel happy. If we find the sensation to be unfavourable, we feel unhappy. You can observe this for any sensation – sound, touch, sight, taste or smell. But can it ensure happiness in continuity?

R.M.K GROUP OF INSTITUTIONS

To take the sweet example further, let us say a particular chocolate is your favorite sweet – you like its taste. You get a lot, say 100 of them. Now you start eating these sweet savories. You put the first chocolate in your mouth. If you like the taste, you feel happy about it but if you don't like the taste, you feel unhappy about it. Let us say you like the taste and continue to eat. So now you have eaten 10 of them and your stomach is full. Do they still remain tasty? Go for another one, and another one...

If you observe carefully, it can be seen that:

When you start eating the sweet, it seems tasty (for you) and necessary (for the Body). You are eating for happiness (for you) as well as for nurturing your body.

Once your stomach is full, it still seems tasty (to you), but it is now unnecessary (for your Body). Now you are still eating for happiness from the taste of it (for you), but you know it is no longer necessary for nurturing your Body.

If you continue to eat some more and you are full up to the neck, what is your state? The sweet is no more a source of happiness for you. At the same time, it remains unnecessary for nurturing the Body. It is still your favorite sweet, but now it is neither tasty to you nor necessary for your Body. Now you want to stop eating it.

But if someone forces you to eat further; eating the same sweets becomes intolerable. Now, it turns into a source of unhappiness for you; and you have to deal with the stomach ache on top of it!

The conclusion is that you do get some sort of happiness from the sensation. However, this happiness is momentary, very short lived and it seems to pass through the following stages:

(2) Pleasure (from favorable sensation)

Sound, Touch, Form, Taste, Smell – Through the Body

Tasty-Necessary → Tasty-Unnecessary → Tasteless-□ Unnecessary → Intolerable

R.M.K GROUP OF INSTITUTIONS

Firstly, continuity of happiness is not possible from eating chocolates, nor from any other food or any other sensation for that matter; be it sound, touch, sight, taste or smell. Secondly, you become bored of the taste after indulging in it for some time. Even if one wants to get happiness out of taste, one has to keep changing from one sensation to another to another. Thirdly, the little temporary happiness you get from the taste is dependent on something outside, i.e. the chocolate in this example. There is no guarantee that you will get chocolate as and when you want to derive happiness out of its taste.

This applies to any sensation from which one is trying to derive happiness.

[A point of caution: We are not saying that physical facility is not required. It is required for the Body. However, it cannot ensure continuity of happiness. Similarly, sensation has its definite role for the Body, but it cannot ensure continuous happiness.

(3) Attention, Appreciation… (favourable feelings)

Sometimes "happiness", excitement… Sometimes "unhappiness", depression…

Is it possible to ensure continuity of happiness by receiving favourable feelings from others? Let us study this phenomenon.

Other Human Being → Expression of Feeling → Feeling Received and Evaluated by Self

- If feeling is favourable → Happiness (Temporary)

- If feeling is unfavourable → Unhappiness (Temporary)

When someone is expressing a right feeling, like respect, that is naturally acceptable for you, you like to receive that feeling – you feel happy. Of course, if the other is expressing emotions that are not naturally acceptable for you, e.g. disrespect, you feel unhappy.

R.M.K GROUP OF INSTITUTIONS

Dependence on sensation, can't give continuous happiness.

Continuity of Happiness from Favourable Feeling from Others?

The second prevailing notion is that we can be happy by getting favourable feelings from others. We tend to feel happy when others pay attention to us, when others praise us, when others respect us, care for us or express any favourable feeling to us.

For that, we keep doing all kinds of things. Wearing clothes of the latest fashion, going to college on that borrowed motorcycle and so many other things like that. Similarly, we may be pretending to be more than what we really are or agreeing with people just to be in their good books and to get their attention. All these are examples of our effort for getting feelings from others. We have a deeply held belief that we will get happiness like this.

To take an example, you wear an exclusive dress while going to a party. Your expectation is that you will be noticed in the party, people will compliment you and this will make you happy. You enter the door and the host appreciates your dress – you feel happy. Next minute another person points out that this dress is now out of fashion; he saw it in the neighbourhood goodwill store – your happiness is replaced by unhappiness.

The conclusion is that you do get some sort of happiness from the attention and feeling you get from others. However, this happiness is momentary, very short lived. So firstly, continuity of happiness is not possible through getting feelings from the other. Secondly, the little temporary happiness you got from the compliments is not your own property. You are not deciding the feeling – it is being decided by the other person. There is no certainty that they will notice you again or if they will even be around next time!

Happiness is not the same as Excitement

The question is whether the feeling that we got is happiness or something else.

Was what we got from the favourable sensation = happiness?

Was the favourable feeling we got from the other = happiness?

R.M.K GROUP OF INSTITUTIONS

What we got in both cases is a sort of momentary happiness. We are calling it excitement. There is a confusion between excitement and happiness (a harmonious state within).

Excitement is short lived, not sustainable, while a harmonious state within is something which can be continuous and sustainable.

You have an expectation, say for a particular sweet, and if that expectation is fulfilled, you feel happy. However, since you are looking for continuity of happiness, you try to continue, in this case eating the sweet. But sooner or later you see that it cannot be continued indefinitely, so that happiness from eating the sweet dies out. In fact, there is no possibility to continue this happiness from eating sweets.. You are able to see that you have a deeper desire for continuity of happiness which this sweet is not able to fulfil.

This temporary happiness we are getting out of favourable sensation or out of the feeling we receive from the other is not really happiness (harmony). It is just a temporary state of excitement. If you look at it in a deeper sense, you would realize that this excitement is actually creating a disharmonious state within. That is why you feel uncomfortable when you are in a state of excitement, so much so that it starts reflecting on your body in terms of disturbed pace of breathing, high blood pressure,etc.

Other Prevailing Notions about Happiness

You can find out if these ways of escaping from unhappiness work or not. Take for example, people who smoke. Does their intake of cigarettes go up or does it go down when they are in more tension?

R.M.K GROUP OF INSTITUTIONS

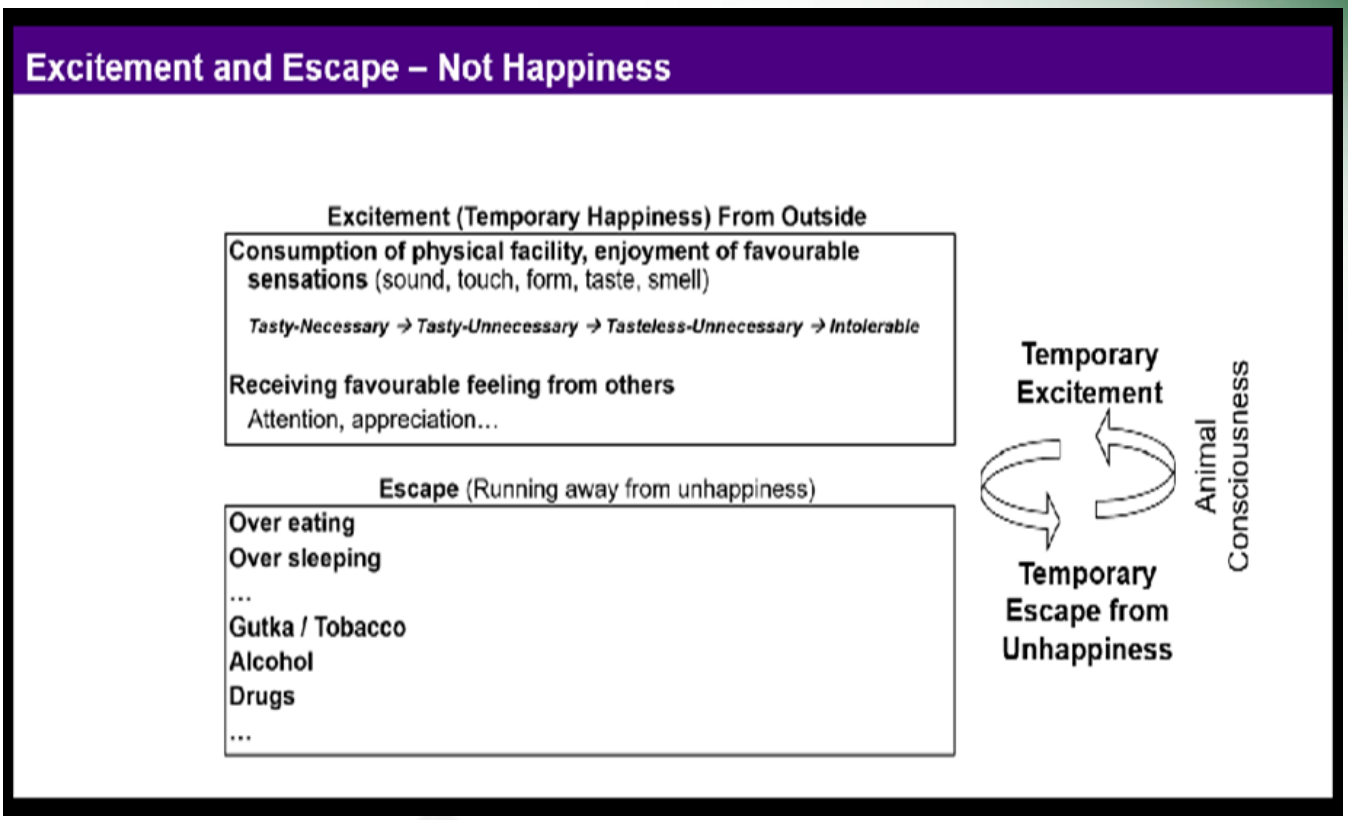

Fig. 1.11

- Generally, the more the tension, the more is the intake of cigarettes. Needless to say, there are adverse side effects on the health of the Body. Is it a permanent solution to unhappiness? We can easily see that cigarettes or any of the other means used for escape (such as alcohol, drugs, over eating, etc. as listed above) is not a permanent solution.
- Another observation is that people with such assumptions about happiness tend to keep moving between excitement and escape. If we observe people working under unfavourable conditions they are under a lot of pressure. Such people tend to take to one escape route or the other, in the name of relaxing, chilling out, etc., so much so that it may even become an addiction. We can observe many well-meaning people caught up in this cycle.

R.M.K GROUP OF INSTITUTIONS

Of course, such methods of trying to get happiness from outside, or the efforts for escaping from unhappiness in this manner are futile. Not only do these methods not work, but they also have many undesirable side effects. For example, rates of obesity, depression and suicide are increasing globally, particularly in high income societies, due to this confusion. Like that the side effects can be observed at every level – exploitation of human beings as well as exploitation of nature, as indicated in fig.

The problems mentioned above have to do with one's notion of happiness and the programme for its fulfillment. By now, you would have appreciated that in order to move towards a fulfilling life, it is of utmost importance to have clarity about happiness and prosperity.

1.6 Method to fulfill the above human aspirations: understanding and living in harmony at various levels.

The Programme for Happiness

We have seen that happiness is to be in a state of harmony. The expanse of our living encompasses four levels – individual, family, society and nature/existence. The programme for harmony is to make the necessary effort to understand harmony and to live in harmony at all levels of our being. This is articulated in figs.

We have earlier proposed that the basic human aspiration for continuity of happiness and prosperity is fulfilled by right understanding in the Self, fulfillment in relationship and physical facility.

Right understanding is essentially the understanding of harmony in the entire expanse of our being, i.e. harmony in the human being, in the family, in the society and in nature/existence. If we are able to see the harmony at all these levels, there is a possibility of living in harmony at all these levels.

R.M.K GROUP OF INSTITUTIONS

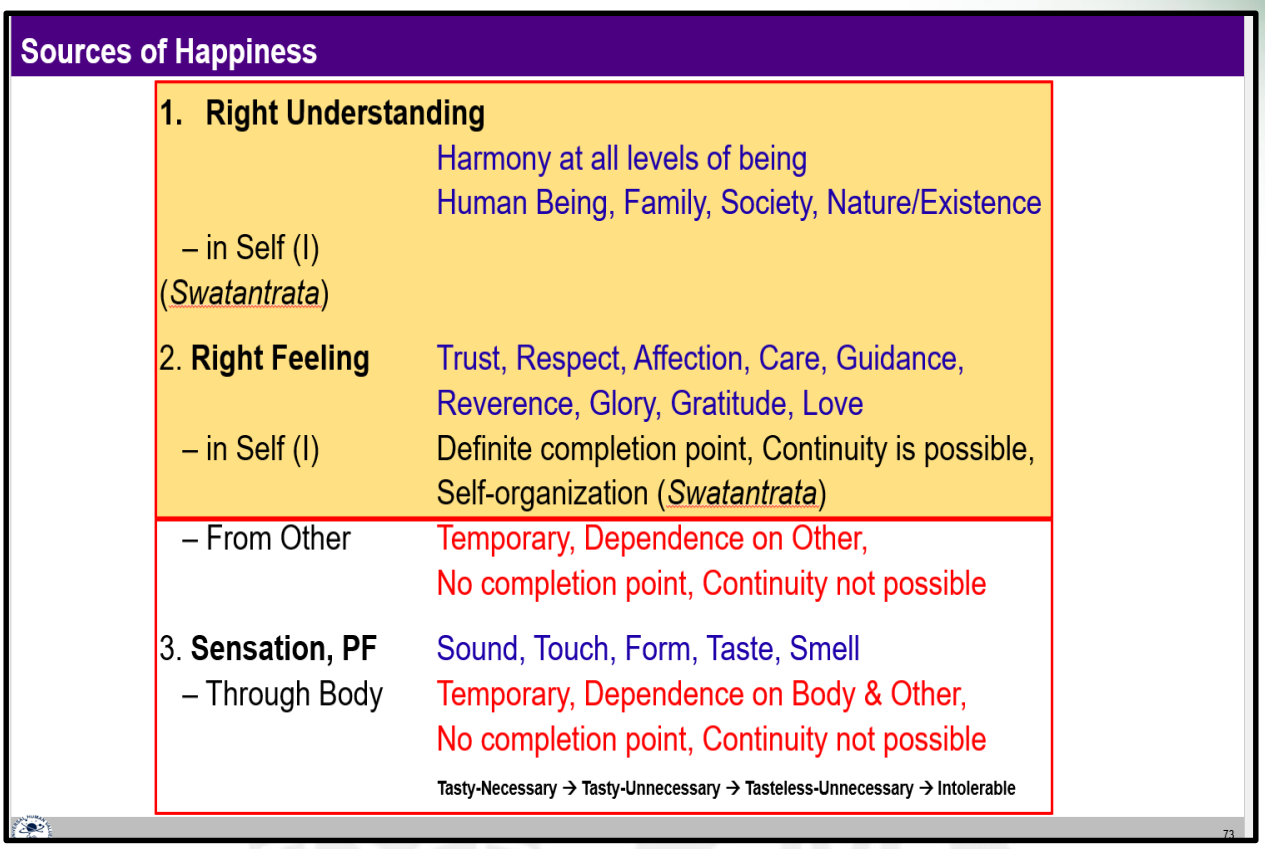

Fig. 1.12

The basic human aspiration is to be in a state of continuous happiness and prosperity. It is something we want to be and continue to be, without any break.

For fulfillment of human aspiration, three things are necessary: right understanding in the Self, fulfillment in relationship with human beings and physical facility with the rest of nature, in that order of priority.

Fulfillment of relationship (with human beings) leads to mutual happiness, and fulfillment of physical facility (with rest of nature) leads to mutual prosperity.

Living with all three, right understanding, relationship, and physical facility, in that order of priority, is fulfilling for human beings. Seeking and ensuring fulfillment in this manner is living with human consciousness.

R.M.K GROUP OF INSTITUTIONS

Living solely based on physical facilities is not fulfilling for human beings – for human beings, physical facility is necessary, but it does not be sufficient. It may be adequate for the fulfillment of animals. If one is seeking fulfillment solely out of physical facility, ignorant of the need for right understanding and relationship, (s)he is living with animal consciousness or inhuman consciousness.

Animals living with animal consciousness are fine, they are in harmony; only human beings, living based on physical facility alone tend to be in disharmony; so, human beings living with animal consciousness is a problem.

The transformation from animal consciousness to human consciousness is the essential core of holistic development. With human consciousness at the base, holistic development includes development of relationship as well as required physical facility.

Education-Sanskar has the pivotal role in the development of human consciousness. It must ensure right understanding in the Self of every child, capacity to live in relationship with other human beings as well as the capacity to identify the need for physical facility, the skills and practice for sustainable production of more than what is required, leading to the feeling of prosperity.

Such an education will eventually be able to prepare the child with the competence to be in harmony within, to live with definite human conduct and to be in harmony with the world outside for actualizing an undivided society and universal human order.

Happiness (Harmony) Within

Right Understanding – in Self (I)	Understanding harmony at all levels of being (human being, family, society, nature/existence)
Right Feeling – in Self (I)	Trust, Respect, Affection, Care, Guidance, Reverence, Glory, Gratitude, Love

Fig. 1.13

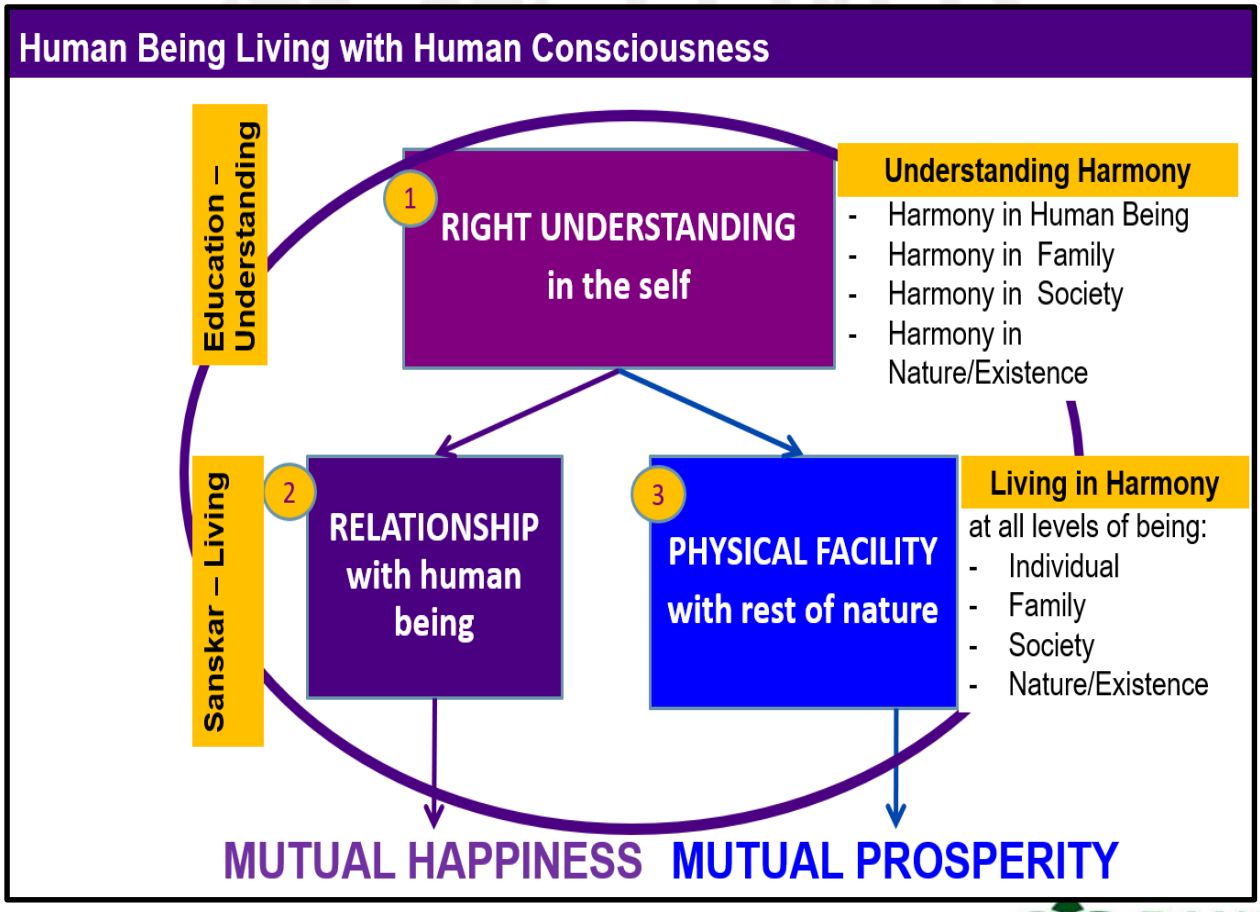

Fig. 1.14

R.M.K GROUP OF INSTITUTIONS

Term Work & Self-Learning Activities

- **Activity - 1 – Self-Exploration and Human Aspirations**
- Students shall prepare an assignment based on **self-exploration**, focusing on understanding their own thoughts, desires, expectations and priorities. The activity shall include reflection on the meaning of **happiness and prosperity**, the difference between **right understanding and physical facilities**, and the role of relationships in achieving continuous happiness. Students shall identify situations from their daily life where they have reacted based on assumptions and reflect on how self-exploration can help them arrive at clarity and make responsible decisions.
- **Activity 2 - Importance of Relationships**
- Students shall work individually or in small groups to prepare a **short video/project on the importance of relationships over accumulation of physical facilities**. They shall identify common situations in family, friendship, classroom or workplace where relationships are affected due to excessive importance given to money, possessions or physical facilities. The project should highlight values such as **trust, respect, affection, care, guidance, gratitude and love**, and suggest practical ways of maintaining harmonious relationships. Students shall present their observations through a short video followed by reflection/discussion.

R.M.K GROUP OF INSTITUTIONS

Activity -3

- Meaning and need of **self-exploration**
- Understanding **continuous happiness**
- Understanding **prosperity**
- Difference between **happiness and physical facilities**
- Role of **relationships** in human happiness
- Importance of **right understanding**
- Observation of one's own thoughts, desires and expectation

R.M.K GROUP OF INSTITUTIONS

COMPREHENSIVE QUIZ

1. Natural Acceptance:

a) It does not change with time.

b) It does not depend on the place.

c) It does not depend on our beliefs or past conditioning.

d) All of the above

2. For Human consciousness:

a) Physical facility is necessary and sufficient.

b) Physical facility is necessary but not sufficient.

c) Physical facility is not necessary and not sufficient.

d) None of the above

3. Identify the correct order:

a) Physical facility, relationship, Right understanding

b) Physical facility, Right understanding, relationship

c) Relationship, Right understanding, Physical facility

d) Right understanding, relationship, and Physical Facility

4. Needs and activities of self are:

a) Both are continuous

b) Both are temporary

c) Not fixed

d) None of the above

R.M.K GROUP OF INSTITUTIONS

5. What is self-exploration?

a) Dialogue between what you are and what you really want to be

b) It is the process of self-evolution through self-investigation

c) It is the process of knowing human conduct

d) All of the above

6. Right understanding and relationship lead to

a) Mutual Happiness

b) Mutual prosperity

c) Both

d) None of the above

7. Right understanding and physical facilities lead to

a) Mutual Happiness

b) Mutual prosperity

c) Both

d) None of the above

8. Happiness is:

a) Harmony in self

b) Harmony in the body

c) Harmony in both

d) None of the above

R.M.K GROUP OF INSTITUTIONS

TERM 1 ASSIGNMENT

Assignment for Self-exploration

QUESTION 1 – CATEGORY 1

(To help connect the content to one's life, at least at the level of thought, these assignment may be done individually or in a group, particularly with friends and family members)

1. Find out if the following are naturally acceptable to you

Statement	My present thinking (beliefs) about the statement	Is it Naturally Acceptable?
I want to be happy		
I want to make others happy		
I want to be healthy		
I want to live in relationship		
I want to have more than others		
I want to have more than what I really need		
Respect elders		
Respect all		

This is just a sample list. Please make your own list.

Can you observe that when you really try, you can refer to your natural acceptance?

Note any five things that appear naturally acceptable to you.

Now, verify for yourself that your 'natural acceptance' does not change with time or place. It does not depend on your beliefs and past conditionings and that it is always there. If not, would you still call it your natural acceptance?

And if not, what can it be termed as in place of natural acceptance?

QUESTION 2 – CATEGORY 2

Look into yourself, into 'what I am' and into 'what is naturally acceptable to me'.

Make a list of at least ten things you can observe in your thought, behaviour or work. Now note these down (a sample table is given below):

R.M.K GROUP OF INSTITUTIONS

What I am (My thoughts, behaviour or work)	What is Naturally Acceptable to me	Are these two in Harmony or Contradiction?	Do I feel Comfortable or Uncomfortable?	Dialogue
I make my parents happy	I want to make my parents happy all the time	Harmony	Comfortable	
But I get angry with them sometimes	Getting angry is not naturally acceptable to me. I really want to stay calm all the time	Contradiction	Uncomfortable	See example (b), below
Write down other thoughts you have	Write down your natural acceptance here	Harmony or Contradiction?	Comfortable or Uncomfortable?	

Can you see that self-exploration only means that you become aware of your natural acceptance, become aware of "what I am" and start the internal dialogue?

You are basically asking the question "is it naturally acceptable to me" to yourself?

e.g., if I do not want to get angry ever, why do I then get angry?

Find out if you have assumed that on some occasions, it is a must to get angry otherwise the situation will become worse, thus anger is required at times. But when I am angry, I feel uncomfortable within as it is not naturally acceptable to me to get angry! Then what to do? Can there be some other solution? Observe how the dialogue is taking place in you and note it down. What did you learn from observing the dialogue?

R.M.K GROUP OF INSTITUTIONS

PART A – QUESTIONS WITH ANSWERS

1. In Education whether both values and skills are required. If both are required, then what is the priority?

Yes, in education both values and skills are required. The Priority is

i. Understanding 'what to do' = Value Education

ii. Learning 'how to do' and Doing =Technical Education

2. What is Value and Skill education?

Value Education is a part of education that deals with understanding and participation in the larger order and thus ensuring it in living. Skills are required to achieve a particular purpose in an effective and efficient manner, it is not within the scope of technology, management, medicine, etc. to decide the purpose.

3. Highlight the differences between Value and Skill education.

a. Value is "What to do" and a Skill is "How to do"

b. Value means importance and participation; skill means qualities, training, and capabilities.

4. What is the value of a unit?

The value of a unit is its participation in the larger order e.g., The value of a piece of chalk is its participation in the classroom.

The value of a unit is also referred to as its role. e.g., The role of chalk is to write on the blackboard

- .

5. What is the continuity of happiness?

a. Continuity of Happiness= Harmony at all levels of being i.e.

b. Harmony in the Human Being

c. Harmony in the Family

d. Harmony in the Society

e. Harmony in Nature/Existence

R.M.K GROUP OF INSTITUTIONS

6. State the difference between happiness and unhappiness.

Happiness	Unhappiness
The state or situation, in which I live,	The state or situation, in which I live,
if there is harmony / synergy in it,	if there is disharmony / contradiction in it,
then it is Naturally Acceptable to me to be in that state / situation (and I want to continue to be in that state / situation)	then it is not Naturally Acceptable to me to be in that state / situation (and I want to get cut from that state / situation)
To be in a state of Harmony / Synergy is Happiness	To be forced to be in a state of Disharmony / Contradiction is Unhappiness
Happiness = To be in Harmony	Unhappiness = Disharmony

7. State the difference between acceptance and natural acceptance.

Acceptance	Natural Acceptance
What one accepts	**What is acceptable naturally**
under the circumstances, influence of	**About your participation with the other unit**
Others (peer pressure) Own preconditioning, tastes, likes-dislikes... Sensation...	Innate Nature (natural acceptance)
May change with time May change with place May change with person	Does not change with time Does not change with place Does not change with person
Indefinite may depend on circumstances, influences...	**Definite** uncorrupted by preconditioning...
Happiness or unhappiness	**Happiness always** (assurance, satisfaction)

R.M.K GROUP OF INSTITUTIONS

9. List out the five basic guidelines of Value Education.

Values must enable us to live in peace and harmony within ourselves as well as with others (human beings and the rest of nature).

- **Universal**
- **Rational**
- **Natural and Verifiable**
- **All-Encompassing**
- **Leading to Harmony**

10. What is the difference between "belief" and "understanding"?

Beliefs	Understanding
Beliefs are the ad-hoc values	Correct or Right understanding is the Universal human values
Beliefs are usually not the same for everybody	Understanding are the same for everyone
Beliefs are assumed values	Understanding is evaluated values
Belief usually changes with time	Understanding does not change with time.

INSTITUTIONS

11. What are pre-conditionings? What is their source?

or

Do you feerl that you have some pre-conditionings? How do you evaluate them?

Yes, Preconditioning means the condition developed by beliefs. They arise from what we read, what we hear, what our parents tell us, what our friends talk about and what the magazines talk about also what we see on the TV, etc. Most of our desires, thoughts, and expectations are based on this preconditioning. We do not verify our desires in our own right. Because of this, we often end up spending an entire lifetime accumulating desires that are not ours and running about trying to fulfil them. As a result, our desires, thoughts, and selections are always in conflict leading to dissatisfaction and unhappiness.

12. "**Right understanding + Relationship = Mutual fulfillment"- Briefly explain.**

Through the right feeling in a relationship, based on the right understanding, we can ensure mutual happiness ⇒ happiness for ourselves as well as happiness for others.

13. "**Right understanding + Physical facilities = Mutual prosperity"-Briefly explain.**

With the right understanding, we can identify the need for physical facilities. We can also learn how to produce using a mutually enriching production process. Once we can ensure the availability of more than the required physical facilities, we have a feeling of prosperity.

14. What is Prosperity? Give an example.

The feeling of **having/producing more** than the **required Physical Facility is known as Prosperity.**

Example-- based on your self-exploration.

15. What a prosperous person thinks? Give an example.

A prosperous person thinks of the right utilization and nurturing of the other.

- Example-- based on your self-exploration.

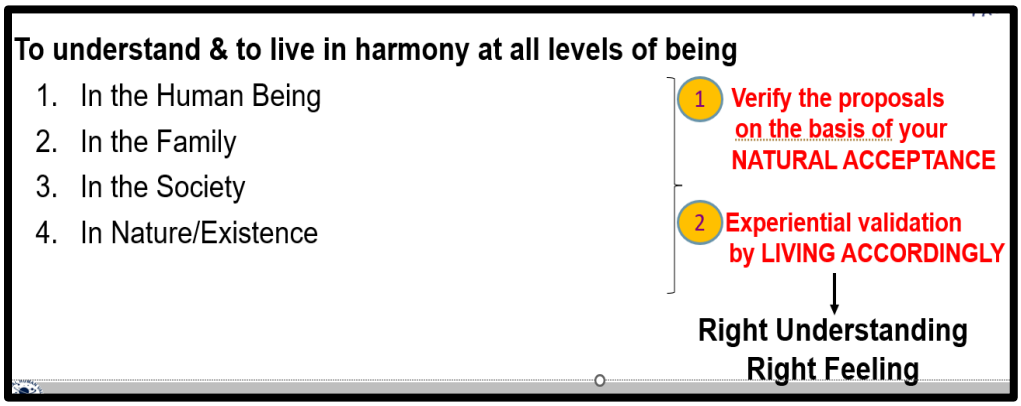

16. What a deprived person thinks? Give an example.

A deprived person thinks of accumulation and exploiting others.

- Example-- based on your self-exploration.

R.M.K GROUP OF INSTITUTIONS

17. What is our program as human being?

18. Is the unhappiness in our families (i) More due to lack of physical facility or (ii) More due to a lack of fulfilment in a relationship? Justify with an example.

- More due to a lack of fulfilment in the relationship.
- Example-- based on your self-exploration.

19. What is the source of happiness?

Right Understanding – in Self (I)	Harmony at all levels of being
	Human Being, Family, Society, Nature/Existence
Right Feeling – in Self (I)	Trust, Respect, Affection, Care, Reverence, Guidance, Glory, Gratitude, and Love (TRACRGGGL)
Definite completion point, Continuity is possible, Self-organized	

R.M.K GROUP OF INSTITUTIONS

PART B – QUESTIONS

1. Explain in detail (i) Value Education and (ii) Skill Education.
2. What is the content of Value Education? What is the need for it?
3. What are the basic guidelines for value education?
4. What is the difference between animal consciousness and human consciousness? How does the transformation from animal consciousness to human consciousness take place in a human being? Explain with a neat diagram.
5. Explain the process of Self-Exploration. What is the expected outcome of self-exploration? OR Explain the content, process, and natural outcome of self-exploration with a neat diagram.
6. What are the basic requirements for the fulfilment of the aspirations of every human being? Or Explain the correct priority of Right Understanding, Relationship, and Physical Facility with a diagrammatic representation.
7. What is temporary excitement and real source of happiness? Explain in detail.

Supportive online courses

eSIP, or the Student Induction Programme, is an initiative by the All India Council for Technical Education (AICTE) to help new students transition into their academic environment. It focuses on making students feel comfortable, sensitizing them to academic activities, and fostering a sense of community and bonding.

Purpose:

The eSIP aims to ease the transition of new students into the academic environment by providing them with information about the institution, its facilities, and the expectations of the program.

Key Components:

The program includes activities designed to:

- Introduce students to the campus, faculty, and staff.
- Familiarize students with the curriculum and academic expectations.
- Help students build relationships with their peers and mentors.
- Promote a sense of community and belonging.
- Encourage students to explore their academic interests.

R.M.K GROUP OF INSTITUTIONS

Real time Applications

We have to understand all that we live with – the Self, the Body, the family, the society, the nature and ultimately, the entire existence

So, ultimately, We have to understand the entire existence

In the first course on UHV, we have seen that:

Existence = co-existence

= units (material and consciousness) submerged in space

So, we are trying to understand:

1. Consciousness (Self)
2. Material (eg. Body)
3. Co-existence, space

By way of the following exercises:

- Exercise 1 is to understand the consciousness (Self) in detail
- Exercise 2 is to understand the material (eg. Body) in detail
- We will briefly touch upon exercise 3, which is for understanding the co-existence, the space

R.M.K GROUP OF INSTITUTIONS

Exercise 1: Observing the Self by the Self – Every Moment

1. Be aware – Observe your imagination at this moment, i.e. the desire (feeling), thought, expectation. Just observe, without any reaction.
2. Is the feeling that you have at this moment naturally acceptable to you? Do you want it's continuity? Just observe, evaluate without any reaction.
3. Are you comfortable, in harmony, happy with the feeling that you have at this moment? Just observe, evaluate without any reaction.
4. Who decided the feeling that you have at this moment?

   Did you decide it or someone else/situation outside decided it?
5. On what basis did you decide the feeling you have at this moment?

   Did you decide it on the basis of understanding or on the basis of an assumption?
6. Which feelings are naturally acceptable to you?

   Feelings of relationship or opposition, harmony or disharmony and co-existence or struggle?

   If feelings of relationship, harmony, and co-existence is naturally acceptable, there is a need to understand relationship, harmony and co-existence.
7. Ensure that the feeling that you have at this moment, is in line with the feeling of Relationship, Harmony and Co-existence and not otherwise.

   If these feelings are ensured in continuity then we will be in state of harmony and happiness every moment i.e. we will be in state of continuous happiness.

   It is important to note that **when I am able to understand relationship, harmony and co-existence in its completeness**, then

   I will be able to decide my feeling, thought accordingly and I will always be comfortable within, I will be in a state of continuous happiness

Exercise 2: Observing the Self, the Body and the interaction between the Self and the Body in Space – by the Self

1. I am, the body is. I can see them by observing their activities.
2. I transact information with the body by giving instruction to body and reading some sensation from the body.
3. I am the one who decides – what instruction are to be passed to the body, and what sensations are to be read from the body.

   I decide to transact – from time to time, as and when required
4. I can read the sensation taking place in any part of the Body from where I am, at a distance from the sensation – there is a distance between the Self and the Body
5. My interaction with the Body or the world outside is by way of sensation. I give meaning to the sensation. My reaction or response depends on my sanskar:

6a. I tend to react if my sanskar is based on assumption

- I decide my feeling (right or wrong), become happy or unhappy based on external inputs – I react

6b. I respond when my sanskar is based on understanding

- I continue to remain in harmony. My feeling remains natural, in accordance with human nature – I continue to be in a state of happiness. I use external input to rightly evaluate the external situation – I respond

Mini Project Suggestions

Category I

Future Resume – Vision for Three Years from Now

- **Objective:**
  Look into what you really want to be and prepare a document (like a resume) as you see yourself three years from now. We can call it "future resume". The resume should include:

a. About you:

i. Your academic scholastic and professional qualifications

ii. Your qualities as a human being (what kind of person you will be)

iii. Your ability to live in relationship with people

iv. Your health

v. Your work skills (what you will be able to do independently, without any help)

vi. Your hobbies, co-curricular and extra-curricular interests

b. About your role in your family (what responsibility you will take in your family and also what you will expect from your family)

R.M.K GROUP OF INSTITUTIONS

MINI PROJECT SUGGESTIONS

Category II

Test Your Understanding after self-exploring all the key proposals given in UNIT 1

With that, you may have some (or many) aha! moments in which something clicks for you, you understand a proposal. What you have understood may be expressed in various creative ways which appeal to different people. This part is for you to give a creative expression to your understanding.

Creative expressions may be in the form of sketches, drawings, paintings, clay models, sculptures, songs, poems, music, dance, audio's, videos, games, puzzles, stories, skits, plays, dramas, charts, diagrams, plans, survey questionnaires, blogs, something on social media and so on. It is the story of your own life – and it matters.

R.M.K GROUP OF INSTITUTIONS

Purpose and Motivation for the Course: Introduction to the significance of Universal Human Values in personal, professional, and social life, along with a recapitulation of the concepts covered in Universal Human Values–I. Self-Exploration: Understanding the meaning, purpose, content, and process of self-exploration as a continuous journey toward self-awareness and self-improvement.

Natural Acceptance and Experiential Validation: Learning how natural acceptance and experiential validation serve as the foundation for self-exploration and right understanding. Continuous Happiness and Prosperity: Exploring the fundamental aspirations of every human being and understanding the concepts of continuous happiness and lasting prosperity. Basic Human Aspirations: Examining the essential requirements for fulfilling human aspirations through Right Understanding, Harmonious Relationships, and Adequate Physical Facilities, while recognizing their correct order of priority.

Understanding Happiness and Prosperity Correctly: Critically analyzing the current societal scenario, identifying misconceptions about happiness and prosperity, and distinguishing between temporary satisfaction and sustainable well-being. Methods to Fulfill Human Aspirations: Understanding how harmony can be established and maintained at various levels, including the individual, family, society, nature, and existence, thereby enabling a balanced, value-based, and meaningful life.

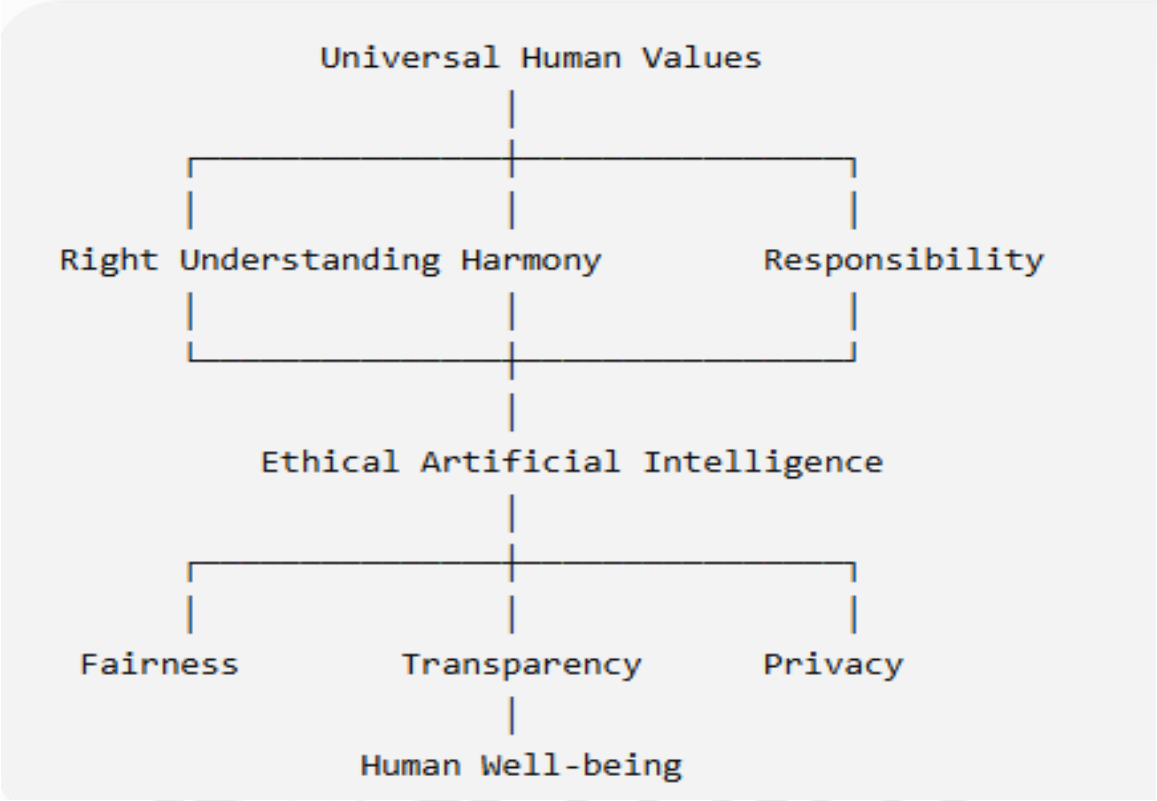

R.M.K GROUP OF INSTITUTIONS

Universal Human Values provide a foundation for leading a meaningful, ethical, and fulfilling life by promoting right understanding, responsible behavior, and harmonious relationships. The process of self-exploration enables individuals to understand their thoughts, desires, and actions through self-reflection, helping them make informed and value-based decisions. Natural acceptance and experiential validation serve as the basis for developing right understanding by encouraging individuals to verify values through their own experiences.

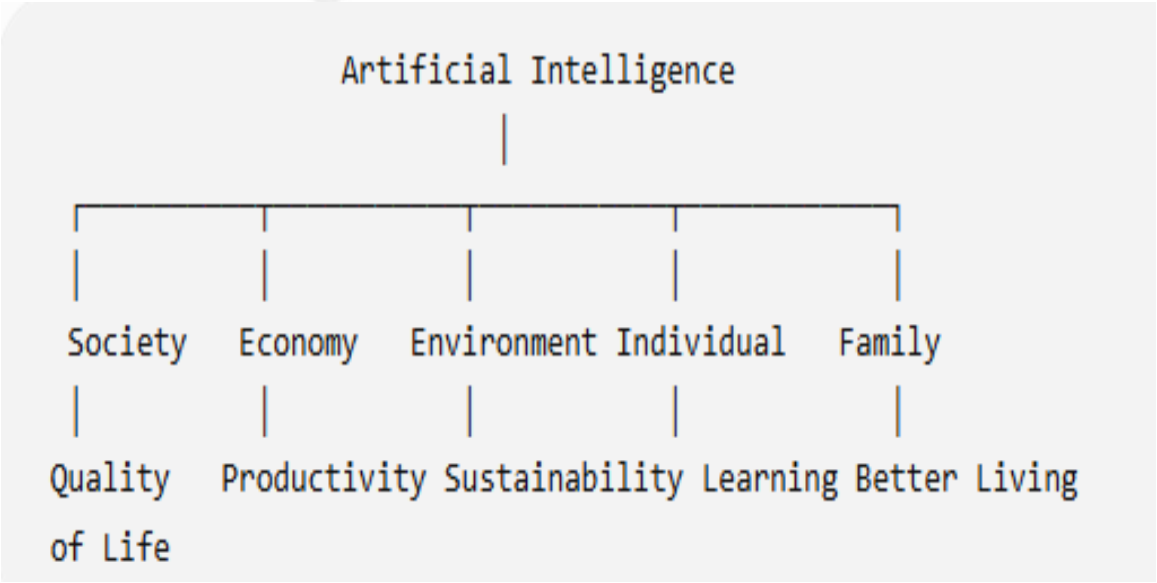

The course emphasizes that continuous happiness and prosperity can be achieved by balancing right understanding, healthy relationships, and adequate physical facilities while recognizing their correct priority. It further explains that human aspirations are fulfilled by living in harmony with oneself, family, society, nature, and the entire existence, thereby enabling individuals to lead peaceful, prosperous, and value-based lives.
